GENERAL ADULT EDUCATION

CONTINUING EDUCATION

Mitchell Community College strives to provide academic and occupational programs consistent with the educational needs of Iredell and surrounding counties. The college provides opportunities for people to further meet their educational goals by offering programs which enable people to pursue occupational, vocational, cultural, and civic interests.

The college strives to serve the needs of the adult community by providing numerous programs of continuing education. Adult programs are held on a continuing basis and are developed according to the community's needs and interests. Courses include formal academic learning, cultural advancement, vocational and technical improvement, and personal enrichment. Any individual who is eighteen years of age or older or is a high school graduate may be admitted to these classes.

CLASS LOCATIONS

Classes are held on campus and at various other locations throughout Iredell County and surrounding counties. Some of the locations are South Iredell High School, Iredell Department of Correction, Mooresville, and various industries throughout the county. An extension center is located at the Mooresville Center and at the Brock Center in Mocksville.

ATTENDANCE

Most classes are scheduled on a quarterly basis. Special workshops and industrial courses are scheduled whenever necessary. Brochures are available each quarter to provide class schedules. Announcements will be made through local news media, including radio stations and the local news paper. Classes usually meet one to three hours each night. Regular attendance should be maintained. For courses offering certificates, eighty per cent attendance is required.

FEES AND SUPPLIES

A registration fee of \$8.00 or \$15.00 is charged for adult classes and is due at the beginning of the course. Students enrolled in courses for Adult Basic Education, Adult High School, Volunteer Fire Departments, local law enforcement, the Department of Correction, and persons 65 years of age or older are exempt from the registration fee. Books are available at the college bookstore or from the instructor when the class meets. The cost of supplies varies according to individual courses.

CONTINUING EDUCATION UNIT

Continuing Education Units are awarded to all classes with the exception of Adult Basic Education, Adult High School, and craft classes. A Continuing Education Unit is defined as "ten contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction." These units provide a means of recording and accounting for non-credit courses, programs, and activities.

ADULT BASIC EDUCATION

The Adult Basic Education Program is designed to assist adults in the fundamentals of English, math, reading, science, and social studies. Classes are set up at various times and locations for the convenience of students, and all materials except paper and pencils are provided. In addition to small group instruction, the opportunity for assistance on a one-to-one basis exists through the Learning Labs in Statesville, Mocksville, and Mooresville. There is no charge for the classes or the lab. Upon completion of the ABE program students may enroll in the Adult High School Diploma program. It is recommended, but not required, that students complete the ABE program before entering the GED High School Equivalency Program.

ADULT HIGH SCHOOL DIPLOMA PROGRAM

This program is recommended for persons who want or need a more academic program of high school completion, for example, those planning to attend college or to enlist in the Armed Forces. The courses of study required of for all students are English, reading, science, social studies, and math. Instruction is offered in regular groups of classroom work if there is a sufficient number of students or through supervised individual work in the Learning Labs in Statesville, Mocksville, and Mooresville. Upon completion of course work, the student takes a standardized test on each subject. When the student passes the five subject tests and the North Carolina Competency Test, he/she is awarded a diploma by the Mooresville or Statesville City School system.

The following requirements must be met before entering the Adult High School Diploma program: 1. Residence: A legal resident of the Mitchell Community College service area.

- 2. Minimum age: 18. Persons between the ages of 16 and 18 may enroll with the written permission of the Superintendent of Schools and a notarized permission letter from a parent or guardian.
- 3. No charge for students attending the Learning Lab.

G.E.D. HIGH SCHOOL EQUIVALENCY PROGRAM

Under this program, individuals may take a series of tests called the General Educational Development Tests. A person's knowledge and skills are tested in five areas: reading, mathematics, natural science, English and social studies. The Equivalency Certificate is issued by the North Carolina State Board of Education and is mailed to the recipient. The certificate is recognized as the equivalent of a high school diploma by industry, agencies of government, employers, colleges, and other organizations.

The following requirements must be met before taking the GED tests:

1. Residence: A legal resident of North Carolina.

- 2. Minimum age: 18. If one is between the ages of 16 and 18 and displays a special need, he/she may be allowed to take the GED tests by filing a special form which is available from the GED Examiner of the Continuing Education Office. This form requires a notarized parental permission to take the tests, as well as the permission of the Superintendent of Schools.
- 3. Cost: \$5.00 initial testing fee.

If a person fails one or more tests, he/she may retest after a six-month waiting period. Those who wish to retest before that time must complete a program of study in a class or Learning Lab. Persons who wish to review before testing may also do so in a class or Learning Lab.

The tests are given one week every month. Interested persons should pre-register for the tests with the GED Examiner at the Continuing Education Office.

THE LEARNING LABS

The Learning Labs, housed on campus in Statesville, at the Mooresville Center in Mooresville, and in the Brock Center in Mocksville, provide adults with individually scheduled, planned, and paced instruction in three major areas of concentration: high school completion, curriculum support, and special interest. The high school completion component consists of proper placement and referral, instruction in the Adult High School Diploma courses, and preparation for the GED tests. The curriculum support component provides supplementary assistance to students enrolled in campus curriculum courses. The special interest component included courses for self-improvement, enrichment, and credit, with actual credit awarded by outside institutions. Materials are provided for use in the Lab and guidance is given by lab coordinators. Lab hours are 8:00 a.m. until 9:00 p.m. Monday through Thursday and 8:00 a.m. until 5:00 p.m. on Friday in Statesville and 8:00 a.m. until 5:00 p.m. Monday through Friday in Mooresville. There is no charge for courses taken through the Labs.

VETERANS

The Adult High School Programs offered through Mitchell Community College are fully recognized by the Veterans Administration for G.I. Bill benefits. Further information about hours requirements and benefits can be obtained from the Continuing Education Office or Veterans Service Office of Mitchell Community College.

CONTINUING EDUCATION COURSE DESCRIPTIONS

Courses listed here are offered throughout the year. Additional courses are scheduled according to need and interest. The suggestions from students and from the community are used in planning and expanding the schedule of courses to be offered. The abbreviation CEU means Continuing Education Units. One unit is equivalent to ten hours of instruction.

MDP-12 hrs. JOB INSTRUCTION TRAINING

This course covers such points as how to get thorough analysis of the job to be taught, how to develop skills in the art of teaching, an understanding of the individual as a learner, and an appreciation of the employee's part in the organization.

NEW AND EXPANDING INDUSTRIES

New and Expanding Industry Training is primarily concerned with the development and administration of programs designed for the purpose of training new employees. This institution, in cooperation with the Industrial Service Division of the State Department of Community Colleges, will design and administer a special program for training the production manpower required by any new or expanding industry creating new job opportunities.

FIRE SERVICE TRAINING

Area fire schools are held to train personnel about techniques and use of new equipment. Classes are held at the municipal and volunteer departments. Other courses are planned upon request. Fire service classes include the following:

FIREMANSHIP W-982

FIP-42 hrs. INTRODUCTION TO FIREFIGHTING

This course is designed for use where firemen must be trained for service as quickly as possible and for departments that have been active not more than two years, and have had no formal training. Topics can be arranged according to the needs established by the fire chief and instructor.

FIP-9 hrs. FORCIBLE ENTRY

Forcible entry means the opening of or the breaking through an enclosure that cannot be opened by conventional means. This course includes breaking a lock, prying open a door or window, and opening floors and roofs.

ROPE PRACTICES FIP-6 hrs.

> Rope work involves the teaching of all the knots and hitches necessary for hoisting tools, ladders, hoses, extinguishers, and for the splicing, care and storage of lifelines and handlines.

FIP-9 hrs. PORTABLE FIRE EXTINGUISHERS

This course is designed to discuss techniques in the proper selection, use and operation of extinguishers to safeguard life and property. It also trains one to be able to select, use and recommend fire extinguishers that are properly suited for the condition that may exist.

FIP-9 hrs. LADDER PRACTICES

.9 CEU's Emphasis in this course is placed on team work and smooth continuous movements which are essential to develop speed and avoid injury. The course incorporates ladder information and practices in type, design and construction, methods and techniques of handling ladders and inspection and care of ladders.

FIP-9 hrs. SALVAGE AND OVERHAUL PRACTICES

This course is designed to present approved techniques in the use and care of salvage equipment used to reduce property damage during any emergency. Overhaul practices cover approved techniques of operation and procedures by which these conditions can be handled.

4.2 CEU's

.9 CEU's

.9 CEU's

.9 CEU's

.6 CEU's

1.2 CEU's

2.2 CEU's

1.2 CEU's

1.0-1.2 CEU'S

This course covers information on the efficient service of pumps, hoses, and nozzles. Also covered are specific fire stream requirements and methods of calculating fire streams. FIP-12 hrs. FIRE APPARATUS PRACTICES 1.2 CEU's This course deals with the proper care and operating practices of motorized fire apparatus. Some topics included are fire apparatus, requirements, special mechanical features and functional equipment (pumpers and aerial ladders), and caring for fire apparatus. FIP-9 hrs. VENTILATION .9 CEU's This course is designed to aid one's understanding of what happens inside a building when it fills with smoke from a smouldering fire, and what is to happen if the condition is handled properly. FIP-12 hrs. **RESCUE PRACTICES** 1.2 CEU's Rescue work is an important function of the fire service. This guide will describe good practices in the careful removal of people from hazards due to fire, explosions, storms, earthquakes, and any other occurance that seriously disrupts normal conditions. FIP-9 hrs. **PROTECTIVE BREATHING EQUIPMENT** .9 CEU's The purpose of this course is to increase one's knowledge of the operation of protective breathing equipment, and the correct method of wearing it. FIRE FIGHTING PROCEDURES 1.2 CEU's This outline discusses ways and means of applying a plan to a course of action, and to provide a system by which firefighting procedures may be selected, applied, and improved upon to meet the needs of a local situation. FIP-no minimum FIRE BRIGADE TRAINING FOR INDUSTRY no minimum CEU's In order to avoid major industrial plant fire losses each plan should maintain a well-trained fire brigade. Each brigade should be ready to meet the needs of the plant which it serves. These

FIP-12 hrs.

brigades do not replace the fire departments but they can and do play a big part in the initial steps taken to prevent costly fires.

FIRST AID

The following is a list of the courses taught in first aid. Upon completion of any one of these courses vou are gualified for Red Cross Certification.

Multi-Media First Aid	12 hrs.
Standard First Aid	18 hrs.
Advanced First Aid	52 hrs.
CPR	9-12 hrs.

FIRE STREAM PRACTICES

FIP-12 hrs.

These courses and others are also designed to meet the Occupational Safety and Health Act requirements.

LAW ENFORCEMENT TRAINING

Mitchell Community College's Continuing Education Division conducts a Police Recruit School under the Minimum Standards Act of North Carolina. In addition, courses are planned in cooperation with local law enforcement agencies to upgrade their personnel.

1.2 CEU's

10

CURRICULUM COURSE DESCRIPTIONS

Following the course name and number appears a numerical code which should be interpreted as follows: first number indicates the number of credit hours; the second number indicates the number of lecture hours; the third number indicates the number of laboratory hours; and the fourth number indicates the number of shop practice hours.

AIR CONDITIONING AND REFRIGERATION

PRINCIPLES OF REFRIGERATION AHR 1001

This is an introduction to the principles of refrigeration. Fundamental to the course will be terminology, the use and care of tools and equipment, and the identification and function of component parts of a system. Other topics to be included will be the basic laws of refrigeration, characteristics and comparison of the various refrigerants, with the use and construction of valves, fittings, and basic controls. Practical work includes tube bending, flaring and soldering. Standard procedures and safety measures are stressed in the use of special refrigeration service equipment and the handling of refrigerants. Prerequisite: none.

AHR 1002 DOMESTIC AND COMMERCIAL REFRIGERATION

6 (3-0-9) The course will involve domestic refrigeration servicing of conventional, hermetic, and absorption systems. Cabinet care, controls, and system maintenance in domestic refrigerators, freezers, and window air conditioning units are stressed. Commercial refrigeration servicing of display cabinets, walk-in cooler and freezer units, and mobile refrigeration systems are studied. The use of manufacturing catalogs in sizing and matching system components and a study of controls, refrigerants, and servicing methods are made. The course also involves the use and care of test instruments and equipment used in servicing electrical apparatus for air conditioning, refrigeration and heating installations. Electrical principles, trouble-shooting, transformers, motors, starting devices, switches, electrical heating devices and wiring are also presented. Prerequisite: AHR 1001 or permission of instructor.

AHR 1003 ESSENTIALS OF AIR CONDITIONING

6 (3-0-9) The course includes the selection of various heating, cooling and ventilating systems, investigation and control of factors affecting air cleaning, movement temperature, and humidity. Use is made of psychrometric charts in determining needs to produce optimum temperature and humidity control. Commercial air conditioning equipment will be assembled, welded and tested. Prerequisite: AHR 1002 or permission of instructor.

AHR 1004 AIR CONDITIONING AND REFRIGERATION SERVICING 6 (3-0-9) The course includes installation, maintenance, and servicing of equipment used in the cleaning, changing, humidification and temperature control in air conditioned spaces. Installation of various ducts and lines, burner operation, controls, testing, adjusting, and trouble shooting are also emphasized. Prerequisite: AHR 1003 or permission of instructor.

AHR 1005 BASIC AIR CONDITIONING AND REFRIGERATION SERVICE AND MAINTENANCE

This course will be a basic introduction to the principles of refrigeration and air conditioning which will include but not be limited to terminology, care and use of tools and equipment and the identification and function of component parts. Heavy emphasis will be placed on practical work experience in the labs.

- AHR 1101 AUTOMOTIVE AIR CONDITIONING 3 (2-0-3) General introduction to the principles of refrigeration; study of the assembly of the components and connections necessary in the mechanisms, the methods of operation, and control; proper handling of refrigerants in charging the system. Use of testing equipment in diagnosing trouble, conducting efficiency tests and general maintenance work. Prerequisite: PHY 1101.
- AHR 1102 STEAM AND HOT WATER HEATING AND COOLING SYSTEMS I 3 (2-0-3) This is a study of the science of heating and/or cooling through the use of chilled and/or hot water or steam. The course gives a basic coverage of the selection of heat distribution units, water chillers, compression tanks, zone valves, zone controls, relief valves, flow control and pressure reducing valves. Prerequisites: AHR 1121, AHR 1115, AHR 1111, AHR 1112.

AHR 1103 STEAM AND HOT WATER HEATING AND COOLING SYSTEMS II 2(1-0-3)A continuation of AHR 1102. The course covers boiler fittings, feed water accessories, steam accessories, combustion accessories, draft control, water treatment, boiler operation and boiler room safety. Prerequisite: AHR 1102.

AHR 1110 INDUSTRIAL HEATING

This is a basic study of the science of heating through the use of circulating hot water and steam. There will be an introduction to both gas- and oil-fired boilers. The course also covers boiler fittings, feed water accessories, steam accessories, combustion accessories, draft control, water treatment, boiler operation and boiler room safety. Prerequisites: ELC 1112, ELC 1113, ELN 1118, DFT 1113.

6 (3-0-9)

6 (3-0-9)

5 (4-0-3)

A step-by-step introduction to the foundation necessary for advanced study in controls. Topics include nature of electricity, rules governing electricity, inductive and capacitive circuits, principles of motor operation, power, transformer principles, relay principles, analyzing control circuits.

AHR 1111

AUTOMATIC CONTROLS I

- AHR 1112 AUTOMATIC CONTROLS II 3 (2-0-3) The use and care of test instruments and equipment used in servicing electrical apparatus for air conditioning and refrigeration installations. Electrical principles and procedures for troubleshooting of the various electrical services used in air conditioning, heating and refrigeration equipment. Included will be transformers, various types of motors and starting devices, switches, protective devices and wiring. Prerequisites: AHR 1111, AHR 1121.
- AHR 1113 AUTOMATIC CONTROLS III 2(1-0-3)Types of automatic controls used in air conditioning and heating. Included in the course will be electrical circuits, capacitors, zone controls, heating controls and cooling controls. Prerequisites: AHR 1112, AHR 1115, AHR 1122.
- AHR 1115 FUNDAMENTALS OF HEATING 5 (3-0-6) An introduction to the fundamentals of heating and heat transfer related to various types of heating systems. The use and care of tools, using instruments to measure combustion efficiencies, and installing equipment and ductwork to make up a heating system are covered. Also introduced are comfort surveys, heat loss and gain, equipment selection and maintenance, solar heating and heat distribution systems. Prerequisites: AHR 1121, AHR 1111 or permission of instructor.
- AHR 1121 PRINCIPLES OF REFRIGERATION 7 (4-0-9) An introduction to the principles of refrigeration, terminology, the use and care of tools and equipment, and the identification and the function of the component parts of a system. Other topics to be included will be the basic laws of refrigeration; characteristics and construction of valves, fittings, and basic control. Practical work includes tube bending, flaring and soldering. Standard procedures and safety measures are stressed in the use of special refrigeration service equipment and the handling of refrigerants. Prerequisite: none.
- AHR 1122 DOMESTIC AND COMMERCIAL REFRIGERATION 5 (3-0-6) Domestic refrigeration servicing of conventional, hermetic, and absorption systems. Cabinet care, controls, and system maintenance in domestic refrigerators, freezers, and window air conditioning units are stressed. Commercial refrigeration servicing of display cabinets, walk-in cooler and freezer units, and mobile refrigeration systems are studied. The use of manufacturer's catalogs in sizing and matching system components and a study of control refrigerants, servicing methods is made. The American Standard Safety Code for Refrigeration is studied and its principles practiced. Prerequisites: AHR 1121, AHR 1111 or permission of instructor.
- PRINCIPLES OF AIR CONDITIONING AHR 1123 6(3-0-9)Work includes the selection of various heating, cooling, and ventilating systems, investigation and control of factors affecting air cleaning, movement, temperature; and humidity. Use is made of psychrometric charts in determining needs to produce optimum temperature and humidity control. Commercial air conditioning equipment is assembled and tested. Practical sizing and balancing of ductwork is performed as needed. Prerequisites: AHR 1122, AHR 1112, AHR 1115.
- AIR CONDITIONING, HEATING, AND REFRIGERATION SERVICING 5 (3-0-6) AHR 1124 Emphasis is placed on the installation, maintenance, and servicing of equipment used in the cleaning, changing, humidification and temperature control of air in an air conditioned space. Lab work involves burner operation, controls, testing and adjusting of air conditioning and refrigeration equipment, and location and correction of equipment failure. Prerequisites: AHR 1123, AHR 1113. ALL YEAR COMFORT SYSTEMS 5 (3-0-6)
- AHR 1126 Auxiliary equipment used in conjunction with refrigeration systems to provide both heating and cooling for "all year" comfort will be studied and set up in the laboratory. Included will be oil fired systems, gas fired systems, water circulating systems, and electric-resistance systems. Installation of heat pumps will be studied along with servicing techniques. Reversing valves, special types of thermostatic expansion valves, systems of de-icing coils, and electric wiring and controls are included in the study. Prerequisites: AHR 1123, AHR 1113.

ANTHROPOLOGY

PHYSICAL AND CULTURAL ANTHROPOLOGY ANT 251

The factors which make for variation in living things are examined along with a thorough study of genetics. The origin of man is traced in detail as much as existing fossil finds will permit. The course covers about a two million year span of time.

5 (5-0-0)

5 (3-0-6)

ART 150 BASIC DESIGN

Upon completion of this course, the student will be able to identify and use the principles and elements of design as they relate to the two-dimensional surface. Flat pattern development, pictorial composition, depiction of special illusion, and value analysis will have been studied.

ART 151 DRAWING I

Upon completion of this course, the student should be able to identify problems and possible graphic solutions of representing visual experience on the two-dimensional surface. The student will have explored a variety of material including pencil, pen and ink, conte, and charcoal and will have employed various techniques with an emphasis upon utilizing these materials and techniques as a means of personal expression.

ART 152 DRAWING II

Upon completion of this course, the student will have been introduced to the study of perspective and other systemized methods of rendering the illusion of form and space. The student will be able to apply elements of good pictorial composition and will have continued to develop technical competence in the use of a variety of material and techniques. Prerequisite: Art 151 or permission of instructor.

ART 155 SERIGRAPHY

Students will demonstrate an understanding of silk screening as a fine art by designing and producing editions of prints which use various techniques such as paper, knife-cut, and photopositive stencils with emphasis on layout and color separation.

ART 156 CRAFTS

Upon completion of this course, the student should be able to design, construct, and exhibit fiber, wood, and glass craft projects. 3 (0-6-0)

ART 157 **CERAMICS I**

Upon completion of this course, the student should be able to (1) design and produce projects by the pinch pot, coil, slab, and potter's wheel methods; (2) utilize various glaze techniques.

ART 158 CERAMICS II

Upon completion of this course, the student should be able to (1) design and produce ceramic projects building on the foundation of skills acquired in Ceramics I, (2) construct one major sculpture project which will combine at least one additional material with the clay, (3) keep an individual test tile record of glaze experiments. Prerequisite: Art 157 or permission of instructor. 3 (0-6-0)

ART 159 **CERAMICS III**

Upon completion of this course, the student should be able to (1) design and produce projects building on the foundation of skills acquired in Ceramics I and II; (2) weigh, mix, and apply glaze formulas to ceramics projects; (3) describe how to load, fire, and unload electric kiln. Prerequisite: Art 158 or permission of instructor.

WATERCOLOR I **ART 160**

Through exercises in technical methods and various approaches to idea generation, the student will be able to produce watercolor paintings which demonstrate a mastery of this medium.

ART 161 WATERCOLOR II

This course is designed to allow further experience and research in the medium of watercolor. Exercises in composition, expression, and color theory will be explored as well as intensive practice in directional interests in content and subject matter. Prerequisite ART 160 or permission of instructor.

ART 162 WATERCOLOR III

An advanced studio course to further refine the student's skill with the particular medium. Nature studies and paintings from imagination will be considered as the main areas of concentration. Ideas concerning product, presentation and exhibition will be explored. Prerequisite: Art 161 or permission of instructor.

ART 163 BASIC PHOTOGRAPHY

The student will be introduced to the Basics of Photography, including use of the camera, composition, and subject matter. Students must provide 35 mm camera.

ART APPRECIATION **ART 180**

A survey of ideas and stylistic trends from cave painting to modern times. Painting, sculpture and architecture of each major period will be discussed. The course is designed to meet state requirements for public school teachers and is open to the general college student.

ART 256 PAINTING I

Upon completion of this course, the student will be able to select tools and materials for painting and will be able to demonstrate a knowledge of the elements of art and the principles of design as they apply to the production of painting.

5 (5-0-0)

3 (0-6-0)

ART 257 PAINTING II 3 (0-6
The student will continue the analysis and production of good pictorial composition and y
continue experimentation in a variety of painting media. Prerequisite: Art 256 or permission
instructor.
3 (0-6
The student will give special attention to painting as a means of personal expression and v
continue to identify and solve the problems of pictorial production such as color, form, and spec
illusion. The student will continue technical experimentation. Prerequisite: Art 257 or permision instructor.
APT 250 SOLUDILLDEL
010-0
In this course the student will experiment with a variety of materials by utilizing the constructive, t additive, and the subtractive processes of sculpture.
3 (0-6 The student will continue to experiment with a variety of materials and methods of sculpture. The
will be an emphasis on carving in wood and stone. Prerequisite: Art 259 or permission of instruct
3 (0-6 Upon completion of this course, the student will have (1) expanded knowledge of basic sculptu
(2) performed individual investigation and work in modeling, casting, carving, and construction,
experimented with recently developed media in sculpture. Prerequisite: Art 260 or permission
instructor.
ART 280 ANCIENT ART HISTORY 5 (5-0
An in-depth study of the evolution of art with specific emphasis on the art of Ancient Egypt a
Ancient Greece. Painting, sculpture and architecture are discussed. Open to general colle
student.
ART 281 RENAISSANCE ART HISTORY 5 (5-0-
An in-depth study of the evolution of 15th and 16th Century art with emphasis on the art from Gie
to Michaelangelo. Painting, sculpture, and architecture are discussed.
ART 282 MODERN ART HISTORY 5 (5-0-
An in-depth study of the evolution of Modern Art with emphasis on the period from J. L. David
Andy Warhol. Painting, sculpture and architecture are discussed.
ART 283 COLOR THEORY 3 (0-6-
The student will continue the analysis and implementation of the principles and elements of desi
with an emphasis upon color theory.
ART 285 INDEPENDENT STUDIO 3 (0-6-
A course designed to permit the student to work beyond the limits of the regular sequence
courses in particular area of art. As the course title indicates, the student will be working indepe
dently on self-determined objectives utilizing the resources of the Art Department. One indepen
ent studio may be taken per area. Prerequisite: Completed sequence of art courses in the area
proposed independent study.
ART 286 INDEPENDENT STUDIO 3 (0-6-
A course designed to permit the student to work beyond the limits of the regular sequence
courses in a particular area of art. As the course title indicates, the student will be worki
independently on self-determined objectives utilizing the resources of the Art Department. O
independent studio may be taken per area. Prerequisite: Completed sequence of art courses in t
area of proposed independent study. ART 287 INDEPENDENT STUDIO 3 (0-6-
A course designed to permit the student to work beyond the limits of the regular sequence
courses in a particular area of art. As the course title indicates, the student will be working
independently on self-determined objectives utilizing the resources of the Art Department. O
independent studio may be taken per area. Prerequisite: Completed sequence of art courses in t
area of proposed independent study.
AUTO BODY REPAIR
AUT 1120 AUTOMOTIVE ELECTRICAL SYSTEMS 4 (3-0-

ART 257 PAINTING II

AUT 1120 AUTOMOTIVE ELECTRICAL SYSTEMS 4 (3-0-3) The course will cover diagrams, sketches, charts, wiring codes, and symbols for automobiles. Analysis charts will be studied to troubleshoot electrical problems with wiring, and electronic devices on new model automobiles.

AUTOMOTIVE MECHANICS

PME 151 AUTOMOTIVE FUNDAMENTALS FOR CONSUMERS

This course is designed to help you prolong the life of your automobile. The topics discussed include the following: the engine and companion systems, preventive maintenance, basic tune-up instructions, and trouble-shooting.

- INTERNAL COMBUSTION ENGINE PME 1001 6 (3-0-9) The course is an introduction to the construction and operation of internal combustion engines. Testing of engine performance, servicing and maintenance of pistons, valves, camshafts, lifters and crankshafts, fuel and exhaust systems, cooling systems, proper lubrication, methods of testing, measuring, diagnosing, and repairing will be studied. The student will develop an ability to read and interpret blueprints, charts, instruction and service manuals. Safety habits and proper use of tools and equipment will be emphasized. Prerequisite: None.
- ENGINE ELECTRICAL AND FUEL SYSTEMS 6 (3-0-9) PME 1002 The course will involve a thorough study of the electrical fuel systems of the automobile. Battery mechanisms, generator and regulators, ignitions, accessories, lighting and wiring, fuel and electrical systems. Interpretation and reading of schematic prints and wiring diagrams will also be presented. Prerequisite: None.

PME 1003 BRAKES, CHASSIS, SUSPENSION SYSTEMS AND AUTOMOTIVE AIR CONDITIONING

The course will include a complete study of various braking systems employed on automobiles and light trucks, components of automotive chassis, suspension systems, principals of refrigeration, test equipment, and schematic prints and diagrams. Prerequisite: None. 6 (3-0-9)

PME 1004 AUTOMOTIVE POWER TRAIN SYSTEMS

The course will include principles and functions of automotive power train systems, clutches, automatic and manual transmissions, torque converters, drive shaft assemblies, rear axles and differentials. Prerequisite: None.

INTERNAL COMBUSTION ENGINE PME 1101 10 (5-0-15) Development of a thorough knowledge and ability in using, maintaining, and storing the various hand tools and measuring devices needed in engine repair work. Study of the construction and operation of components of internal combustion engines. Testing of engine performance; servicing and maintenance of pistons, valves, cams and camshafts, fuel and exhaust sytems, cooling systems; proper lubrication; and methods of diagnosing and repairing. Development of ability to read and interpret blueprints, charts, instruction and service manuals, and wiring diagrams. Prerequisite: None.

PME 1102 ENGINE IGNITION AND FUEL SYSTEMS

A thorough study of the electrical and fuel systems of the automobile. Battery cranking mechanism, generator, ignition, accessories and wiring; fuel pumps, carburetors, and fuel injectors. Characteristis of fuels, types of fuel systems, special tools, and testing equipment for the fuel and electrical system. Interpretation and reading of schematic prints and diagrams. Making sketches of electrical wiring and fuelsystem components for automotive engines and other internal combustion engines. Prerequisite: PME 1101 or permission of instructor.

PME 1110 **EMISSION CONTROL SYSTEMS** 3 (2-0-3) A study of operating principles which apply to control systems currently in use and emission control systems that effectively reduce the volume of air pollutants.

- PME 1116 FRONT-END ALIGNMENT AND WHEEL BALANCING 2(1-0-3)Principles and functions of front-end alignment and wheel balancing on all types of automobiles and light trucks.
- PME 1121 FRONT SUSPENSION, ALIGNMENT, AND POWER STEERING 2(1-0-3)Theory of operation, correct disassembly and mounting of all front suspension parts on various types of frames (car and light truck). A thorough understanding of the function and repair of steering gears (Power and standard), shock absorbers, springs, wheels and tires, pumps, rams, etc. is gained. Theory and application of steering geometry, correct diagnosis of problems and use of the alignment and balancing machines; analysis and correction of tire wearing problems, vibrations, hard steering, pulling, etc. is experienced.

PME 1122 INDUSTRIAL POWER TRAIN SYSTEMS 3 (2-0-3) A study of basic braking systems employed on industrial equipment. Basic principles and functions of power train systems: clutches, transmission gears, drive shaft assemblies, rear axles and differentials. Prerequisite: None.

3 (3-0-0)

6 (3-0-9)

8 (3-0-15)

	uisite: None.	ereq-
PME	AUTOMOTIVE POWER TRAIN SYSTEMS 7 (3-0	1-121
	Principles and functions of automotive power train systems: clutches, transmission gears, to	ralle
	converters, drive shaft assemblies, rear axles and differentials. Identification of troubles, servi	cina
	and repair.	0
PME 1	4 (2)	-0-6)
	Emphasis is on the shop procedures necessary in "troubleshooting" of automotive syste	ems,
	provides a full range of experiences in testing, adjusting, repairing and replacing componen	ts. A
(close simulation to an actual automotive shop situation will be maintained. Prerequisite: PME 1	102,
PME 1	PME 1123, AHR 1101. I203 DIESEL ENGINE SERVICING 7 (3-0	101
	7 (3-0 A thorough indepth knowledge of the diesel automobile engine is developed. Emphasis i	
	design, operation, disassembly, diagnosis and repair. Prerequisite: PME 1101 or permissio	
	instructor.	
PME 1	205 DIESEL ENGINE FUEL SYSTEMS 6 (3-	-0-9)
	Principles and operation of diesel fuel systems, diagnosis of problems, service and repair per	
	ng to cars and light duty trucks. GM, Bosh, VW diesel, Isuzu type of systems will be major syst	ems
	covered. Prerequisite: PME 1101, PME 1102, or permission of instructor.	
PME 1		
	Study in diesel engine rebuilding, tune-up and problem diagnosis with hands-on experience live models. Prerequisites PME 1101, PME 1201, PME 1205.	WILLI
PME 1)-12)
	Detailed study in theory and construction of electronic controlled charging and ignition syste	
	Prerequisite: PME 1102.	
PME 1	224 ADVANCED AUTOMATIC TRANSMISSIONS 5 (3-	0-6)
	This course is designed to provide a measure of depth in the understanding of automatic trans	
	sions. Instruction includes classroom study, demonstrations, and student participation in di	
	sembly, reassembly, and testing of selected transmissions. Special emphasis is placed on principles, function, construction, energy and reprint and "transheating" precedures and reprint the second s	
	ples, function, construction, operation, servicing and "troubleshooting" procedures and repa various types.	
		-0-6)
	Power accessories course will include power equipment added to cars and light trucks	
(electrical components including power windows, roofs, trunk and safety devices, power seats,	and
(electronic equipment for diesel-powered autos will be covered. Prerequisite: PME 1102, PME 1	201,
	PME 1205, AHR 1101.	0.01
PME 1		0-3)
	Study of the new front-wheel drive trains. Operation and repair of steering and alignment of and pinion system will be emphasized. Prerequisite: PME 1124, PME 1116, PME 1121, PME 1	
č	and pinion system will be emphasized. Prerequisite. This Trize, This This, This Trize, The T	120.
	BIOLOGY	
BIO 1	denter de la constante	-3-0)
,	A study of the basic biological principles included in both animal and plant kingdoms. Emphase	SISIS
	placed upon live, taxonomy, the cell, cell divisions, cellular metabolism, photosynthesis, nuc	Sierc
	acids, and genetics. 52 GENERAL BIOLOGY 4 (3-	-3-0)
BIO 1	A continuation of BIO 151. Included are a survey of the plant kingdom and ecological stud	'
	including both plants and animals. Prerequisite: BIO 151.	
BIO 1	53 GENERAL BIOLOGY 4 (3-	-3-0)
,	A continuation of general biology. Included are a survey of the animal kingdom and the struc	ture
i	and function of man as one of the animals. Prerequisite: BIO 151.	0.0)
BIO 1		0-0)
	This course is an introduction to human ecology. Discussed are causes and possible solution problems such as over-population, air-water-food-noise pollution, pesticides, vanishing resour	ces-
	wilderness-wildlife, atomic radiation, and urbanization. Films, guest speakers, five field trips, p	anel
	discussions and lectures are used.	

BRAKES, CHASSIS, AND SUSPENSION SYSTEMS PME 1123

7 (3-0-12) A complete study of various braking systems employed on automobiles and light weight trucks. Emphasis is placed on how they operate, proper adjustment and repair. Also, the servicing of parking brakes is emphasized. Principles and functions of the components of automotive chassis is covered. Practical job instruction in adjusting and repairing of suspension systems. Interpretation of prints, schematics and diagrams pertaining to automotive ch

15

BIO 252 ANATOMY AND PHYSIOLOGY	4 (3-2-0)
A study of the anatomy and physiology of the human body with integrat	ion and homeostasis as
leading factors. Emphasis is on the cell, tissues of the body, integumentary	
muscular system, and digestive system.	
BIO 253 ANATOMY AND PHYSIOLOGY	4 (3-2-0)
A continuation of BIO 252. The systems covered are the nervous, special	senses, circulatory and
immunological. Prerequisite: BIO 252.	
BIO 254 ANATOMY AND PHYSIOLOGY	4 (3-2-0)
A continuation of BIO 253. The systems covered are the respiratory, ex	cretory, endocrine, and
reproductive. Prerequisite: BIO 253.	
BIO 255 — MICROBIOLOGY	5 (3-4-0)
Morphology, physiology, and methods of culture and control of bacter	· · · ·
micro-organisms. The course includes pathogens and epidemiology of r	
requisites: None.	
BUSINESS	
BUS 120 MACHINE CALCULATIONS	4 (3-2-0)
A course to develop proficiency in the operation of the electronic calculate	or and in its use to solve
business related problems.	
BUS 121 MACHINES TRANSCRIPTION	4 (3-2-0)
A course designed to develop proficiency in office work which requires	the use of transcribing
units. Prerequisite: Ability to type 50 words per minute.	and all of the second sec
BUS 122 FILING	3 (3-0-0)
	· · · ·
A study of the fundamentals and theory of filing with special emphasis on	alphabetic, geographic,
subject, numeric, and other filing systems.	
BUS 123 BUSINESS MATHEMATICS	4 (3-2-0)
Meaningful explanations, illustrations, and problems designed to give stu-	dents an understanding
of and the ability to apply mathematical concepts to business activities.	
BUS 124 RECORD KEEPING	3 (3-0-0)
The student will recognize and be able to apply the basic concepts of the sir	· · · ·
student will develop skills which enable him to record and analyze b	
appropriate books of original entry, as well as classify and summarize s	such transactions in an
income statement and balance sheet.	
BUS 130 PRINCIPLES OF INDUSTRIAL MANAGEMENT	5 (5-0-0)
The basic managerial decisions; organizational structure including p	lant location, building
requirements, and internal factory organization and problems of factory	operation and control,
planning, scheduling, routing factory production, stores control, labor c	ontrol, purchasing, and
cost control. Plant problems are utilized as lab experiments.	
BUS 133 INDUSTRIAL SAFETY	5 (5-0-0)
Problems of accidents and fire in industry. Management and supervisory re	` '
accident prevention. Additional topics cover accident reports and the super	
ing and fire prevention; machine guarding and personnel protective equ	
accident code and fire regulations; the first aid department and the line of s	
ity; job instruction and safety instruction; company rules and enforcemen	t; use of safety commit-
tees; insurance carrier and the Insurance Rating Bureau; and advertising	and promoting a good
safety and fire prevention program.	
BUS 134 PRINCIPLES OF SUPERVISION	3 (3-0-0)
Introduces the basic responsibilities and duties of the supervisor and his re	
subordinates and associates. Emphasis on securing an effective work for	
supervisor. Methods of supervision are stressed.	fee and the role of the
	5 (5-0-0)
A study of the principles of work simplification including administration of	
ment, motion study fundamentals, and time study techniques. Use of flo	
multiple activity charts, operation charts, flow diagrams, and methods of	evaluation are included
topics.	
BUS 136 PERSONAL DEVELOPMENT	3 (3-0-0)
A study of the principles that will be of assistance in the understanding of	
on the job. Motivation, feelings, and emotions are considered with particu	
job problems.	la relefence to on-the-
BUS 150 BUSINESS LAW	3 (3-0-0)
A general course designed to acquaint the student with the subject of Busin	less Law and to examine

A general course designed to acquaint the student with the subject of Business Law and to examine fully the subject of contracts.

BUS 151 BUSINESS LAW 3 (3-0-0))
A continuation of Business 150. Topics include the sale of goods, commercial paper, insurance, estate planning, court procedures, agency, and employment. Prerequisite: BUS 150 or permission	, 1
of instructor.	
BUS 152 INTRODUCTION TO BUSINESS 5 (5-0-0))
An introduction to the various areas of business available for concentrated investigation. The business environment, ownership forms, organization, marketing, and the physical factors of the business are examined. Also, personnel, stocks, bonds, insurance, accounting, business statistics, budgets, forecasting, and the legal environment of business are surveyed.	e ,
Development of basic typewriting skills and principles and their application with emphasis on) 1
speed and accuracy. BUS 154 TYPEWRITING 2 (1.4.0)	
BUS 154 TYPEWRITING A continuation of Business 153, with emphasis on outlines, letter styles, and typing from draft copy. Prerequisites: BUS 153 or permission of instructor.)
3 (1-4-0) A continuation of Business 154 with emphasis on manuscripts, legal documents and duplicating	
processes. Prerequisite: BUS 154 or permission of instructor. BUS 156 SHORTHAND 4 (3-2-0)	
Mastery of the fundamentals of Gregg Shorthand theory and speed building. Prerequisite: Ability to	
type or permission of instructor. BUS 157 SHORTHAND 4 (3-2-0)	
A continuation of the study of Gregg Shorthand theory and development of dictation and transcrip-	/
tion skills. Prerequisite: BUS 156 or permission of instructor. BUS 158 SHORTHAND 4 (3-2-0)	
Development and application of the principles of Gregg Shorthand theory, with emphasis on	·
accuracy and speed. Prerequisite: BUS 157 or permission of instructor. BUS 161 ACCOUNTING PRINCIPLES 4 (3-2-0)	
This first quarter of accounting builds the basic foundation for further study. Topics included are the basic accounting structure, journals, ledgers, the completion of the cycle for a service and mercantile enterprise, receivables, payables, inventory methods, deferrals, accruals, practical problems and case studies.	, e
BUS 162 ACCOUNTING PRINCIPLES 4 (3-2-0)	
A continuation of BUS 161. Items covered are plant and intangible assets, internal control, payroll systems, concepts and principles, partnership, corporations, departments, branches, practical problems, and case studies. Prerequisite: BUS 161 or permission of instructor.	1
BUS 163 ACCOUNTING PRINCIPLES 4 (3-2-0)	1
A continuation of BUS 162. Topics are an introduction to cost accounting, budgetary control, income taxes, management concern for cost and revenue relationships, special analysis, special statements, practical problems and case studies. Prerequisite: BUS 162 or permission of the instructor.	I
BUS 201 TYPEWRITING 3 (1-4-0)	
An expansion of the development of typewriting principles and skills and their application with emphasis on speed and accuracy. Prerequisite: One year of typewriting or permission of instructor.	
BUS 202 TYPEWRITING 3 (1-4-0)	
Business letter styles, legal papers, tabulation, business and accounting reports, manuscripts, and forms applicable to the business office are emphasized. Prerequisite: BUS 201 or permission of instructor.	
BUS 203 TYPEWRITING 3 (1-4-0)	
Development of sustained production of forms used in the business office. Prerequisite: BUS 202 or permission of instructor.	
BUS 211 SHORTHAND AND TRANSCRIPTION 4 (3-2-0)	
A review of Gregg Shorthand theory and the principles of English grammar with emphasis on the student's ability to take and transcribe correctly from familiar and unfamiliar dictation at varying)
rates of speed. Prerequisite: BUS 158 or permission of instructor. RUS 212 SHORTHAND DICTATION AND TRANSCRIPTION 4 (3-2-0)	
BUS 212 SHORTHAND DICTATION AND TRANSCRIPTION 4 (3-2-0) This course emphasizes speed, accuracy, vocabulary, and transcription abilities to enable the student to meet the requirements of the business office. Prerequisite: BUS 211 or permission of	;
instructor.	

BUS		4 (3-2-0)
	A continuation of BUS 212. Prerequisite: BUS 212 or permission of instructor. 220 BUSINESS COMMUNICATIONS	3 (3-0-0)
	The study and the composition of business letters and other forms of communication. Pres	` '
	Ability to type or permission of instructor.	
BUS :	221 OFFICE PROCEDURES Efforts will be made to observe and direct students in developing those characteris personality traits which are essential in the modern business office. Training in office de procedures will be emphasized. Prerequisite: Ability to type or permission of instructor.	
BUS		3 (3-0-0)
	A continuation of BUS 221. This course presents a series of integrated office activities emphasize the administrative aspects of secretarial work. Prerequisite: BUS 221 or permissing instructor.	
BUS		3 (3-0-0)
	A study of the fundamentals of effective selling, qualifications and obligations of sales p	```
	224 BUSINESS MANAGEMENT	5 (5-0-0)
BUS	Principles of business management including overview of major functions of management planning, staffing, controlling, and financing. Clarification of the decision-making function the operating function. Role of management in business — qualifications and requirement 225 PRINCIPLES OF MARKETING	on versus
	A survey of the functions and problems involved with getting products moved from the pro	` '
	the consumer.	
BUS	226 OFFICE MANAGEMENT	5 (5-0-0)
	The study of the principles of management as it relates to the office.	
BUS		3 (3-0-0)
	This course is oriented toward personal financing as opposed to financing the busine. Topics include budgets, insurance, credit procedures, personal investments, housing, re	
BUS	retirement planning, and estate planning. 229 BUSINESS FINANCE	3 (3-0-0)
000	Financing of business units, as individuals, partnerships, corporations, and trusts. Topic	` /
	short-term financing, long-term financing, financing federal, state, and local governmen factors affecting supply of funds, monetary and credit policies.	
BUS		4 (3-2-0)
	Principles and techniques of quality control and cost saving. Organization and proce efficient quality control. Functions, responsibilities, structure, costs reports, records, p and vendor-customer relationships in quality control. Sampling inspections, process co tests of significance.	ersonnel
BUS	-	5 (5-0-0)
	Emphasis is placed on the history of the labor movement in the United States; the develo methods and strategies by labor organizations and by management; the shift in the means	pment of
BUS	control; and the factors of income and economic security. 233 FOREMANSHIP SUPERVISION	3 (3-0-0)
	The foreman's responsibility for planning, organizing, directing, controlling, and coo supervisory activities. It teaches the supervisor the basic functions of an organization responsibilities, policies and procedures, and rules and regulations.	rdinating
BUS		3 (3-0-0)
	Principles of organization and management of personnel, procurement, placement, train formance checking, supervision, remuneration, labor relations, fringe benefits, and secu	ning, per- irity.
BUS		5 (5-0-0)
	Day-to-day plant direction; forecasting, product planning and control, scheduling, disp routine and inventory control. Case histories are discussed in the classroom, and co corrective action are developed. Actual layouts are utilized for planning and control.	batching, ourses of
BUS		5 (5-0-0)
	This course is an approach to the study of the principles of risk, risk management, and techniques in the context of the managerial decision-making process. Topics include ris nature of insuring devices, life, health, retirement, property, and liability insuring devices; and integrating risk treatment programs, and insuring organizations and their functions.	k and the planning
BUS	241 INTERMEDIATE ACCOUNTING	4 (3-2-0)
	A review and expansion of accounting principles which includes, among other aspects, the	balance
	sheet, income statement, earnings statement, fundamental processes of recording, of temporary investments, and analysis of working capital. Prerequisite: BUS 163 or perm	cash and

18

instructor.

site: BUS 242. COST ACCOUNTING TAXES and inheritance taxes. Prerequisite: BUS 161 or permission of instructor. AUDITING permission of instructor. **BUSINESS OPERATIONS** CHEMISTRY **GENERAL CHEMISTRY** gaseous state, the kinetic molecular theory and chemical calculations. GENERAL CHEMISTRY CHM 162 161. GENERAL CHEMISTRY CHM 162. PHYSIOLOGICAL CHEMISTRY basic chemistry course for student nurses. ORGANIC CHEMISTRY A study of the compounds of carbon. Emphasis will be on the alkanes and alkenes, their reactions, and stereochemistry. Prerequisite: CHM 163.

- CHM 272 A continuation of CHM 271 including the study of aromatics, reaction mechanisms, theoretical syntheses, and IR spectroscopy. Prerequisite: CHM 271. 4(3-3-0)ORGANIC CHEMISTRY
- CHM 273 A continuation of the topics of CHM 272 including natural products and polymers. Prerequisite: CHM 272.

CIVIL ENGINEERING

SURVEYING CIV 1101

Additional study of intermediate accounting with emphasis on current liabilities, investments, plant and equipment, intangibles, and long-term liabilities. Prerequisite: BUS 241.

INTERMEDIATE ACCOUNTING BUS 243

INTERMEDIATE ACCOUNTING

4 (3-2-0) A continuation of BUS 242 which includes study of paid-in capital upon corporate formation and subsequent to corporate formation, all aspects of retained earnings and the retained earnings statement, statements from incomplete records, errors, and financial statement analysis. Prerequi-

BUS 244

A study of the nature and purposes of cost accounting for direct labor, materials, and overhead; job cost, standard cost and principles and procedures; selling and distribution cost, budgets, and executive use of cost figures. Prerequisite: BUS 163 or permission of instructor. 4 (3-2-0)

BUS 246

BUS 242

A study of the application of federal and state taxes to various businesses and business conditions, income taxes, payroll taxes, intangible taxes, capital gain taxes, sales and use taxes, excise taxes,

BUS 248

A study of conducting audits and investigations, setting up accounts based on audits, collecting data on working papers, arranging and systematizing the audit, and writing the audit report. Emphasis on detailed audits, internal auditing, and internal control. Prerequisite: BUS 163 or 3 (3-0-0)

BUS 1103

An introduction to the business world, problems of small business oepration, basic business law, business forms and records, financial problems, ordering and inventorying, layout of equipment and offices, methods of improving business, and employer-employee relations.

CHM 161

A course designed to introduce a student to the fundamental concepts of chemistry. Topics of study include chemical symbols, formulas, atomic structure, periodic law, chemical bonding, the 4 (3-3-0)

A continuation of CHM 161. Emphasis to be placed on the liquid and solid states, solutions, electrolytes, colloids, oxidation-reduction reactions, and chemical equilibrium. Prerequisite: CHM 4 (3-3-0)

CHM 163

A continuation of CHM 162. Emphasis to be placed on the study of thermodynamics, electrochemistry, solubility product principle, hydrolysis, with an introduction to nuclear chemistry, biochemistry, and organic chemistry. Laboratory will include semimicro qualitative analysis. Prerequisite:

CHM 164

A course structured to provide an understanding of the scope, aims, and fundamentals of modern chemistry by presenting facts, theories, and principles of the science. The course will serve as the

CHM 271

4(3-3-0)ORGANIC CHEMISTRY

3 (2-0-3)

Basic instrumentation and topography, together with field trips and drafting room application of site surveying. Prerequisite: MAT 1103.

CRIMINAL JUSTICE — PROTECTIVE SERVICE TECHNOLOGY INTRODUCTION TO CRIMINAL JUSTICE

CJC 101 This course is designed to familiarize the student with a philosophy and history of law enforcement, its legal limitations in our society, the primary duties and responsibilities of the various agencies in the criminal justice field, the basic processes of justices, an evaluation of law enforcement's current position, and an orientation relative to the profession as a career.

CJC 102 CRIMINOLOGY

A general course designed to introduce the student to the causation of crime and delinquency. The historical and contemporary aspects of crime, law enforcement, punishment, and correctional administration will be discussed.

JUVENILE DELINQUENCY CJC 110

General survey of juvenile delinquency as an individual and social problem, theories of delinquency, causation, and methods of correction and prevention. The course will present a general overview of the juvenile court.

CJC 115 CRIMINAL LAW

A course designed to present a basic concept of criminal laws and to provide a legal groundwork for those who seek to enter the criminal justice field.

CJC 125 CRIMINAL PROCEDURE

This course is designed to provide the student with a review of court systems; procedures from incident to final disposition; principles of constitutional, federal, state, and civil laws as they apply to and affect law enforcement.

N.C. JUVENILE DETENTION AND CORRECTIONS CJC 201

This course examines the juvenile court procedure, juvenile detention and juvenile correction in North Carolina.

CJC 202 TRAFFIC ENFORCEMENT

A study which covers the history of the traffic enforcement problems and gives an overview of the problem as it exists today. Attention will be given to the three E's (enforcement, evaluation, effectiveness) and legislation, the organization of the traffic unit, the responsibilities to the traffic function of the various units within the law enforcement agency, enforcement tactics, evaluation of the traffic program effectiveness and the allocation of men and materials. Accident investigation is stressed.

CJC 203 CORRECTIONS

An examination of the total correctional process from law enforcement through the administration of justice, probation, prisons and correctional institutions, and parole. This course will provide a history and philosophy in the field of correction.

CJC 204 PAROLES, PROBATION, AND PARDONS

3 (3-0-0) Probation as a judicial process and parole as an executive function are examined as communitybased correctional programs and the use of pardons is reviewed.

CJC 205 **CRIMINAL EVIDENCE**

Instruction covers the kinds and degrees of evidence and the rules governing the admissibility of evidence in court.

CJC 206 COMMUNITY RELATIONS

3(3-0-0)This course will provide the student with an understanding of community structures as they relate to minority groups, peer groups, socioeconomic groups, leader groups, and group relations. Emphasis will be placed on the organization and function of these groups as they relate to the profession of criminal justice-protective service.

CONFINEMENT FACILITIES ADMINISTRATION CJC 207

This course is designed to familiarize the student with the supervision and administration of confinement facilities involving techniques of inmate supervision, security, medical care of prisoners, food preparation, sanitation, and various legal aspects controlling detention facilities, correctional institutions, and jails.

CJC 209 CORRECTION LAW

This course is designed to familiarize the student with the specific laws as they pertain to correction, care, custody, and control.

CJC 210 CRIMINAL INVESTIGATION

5 (4-2-0) This course introduces the student to fundamentals of investigation; crime scene search; recording, collection, and preservation of evidence; sources of information, interview and interrogation, case preparation, and court presentation.

5 (5-0-0)

3 (3-0-0)

5 (5-0-0)

3(3-0-0)

5 (5-0-0)

CJC 211 **CRIMINALISTICS I**

5 (4-2-0) A course designed to introduce the student to the forensic aspects of police science and the crime lab, its function and scope. The student is further introduced to lab equipment generally found in use in a police crime lab. In addition, the course studies physical and chemical properties of certain substances, chemical changes, weights and measurements, and organic analysis and inorganic analysis.

CJC 212 **CRIMINALISTICS II**

5 (4-2-0) A continuation of the forensic aspects of police science. The subject matter concentrates on the procedures to be undertaken in the crime lab. Emphasis is placed on fulfilling all legal requirements regarding handling and evaluation of physical evidence. All students participate in a crime scene and the investigation of all evidence pertaining to the crime.

CJC 216 ADVANCED CRIMINAL LAW

A continuation of Criminal Law I which presents a basic concept of criminal law and creates an appreciation of the rules under which one lives in our system of government. Primary emphasis will be placed on North Carolina law. Prerequisite: CJC 115.

CJC 217 PATROL ADMINISTRATION

This course defines the purposes of patrols and describes the types of patrols. It explains the operation of police vehicles on patrol, answering calls - emergency and non-emergency and felony in progress. It provides the student the opportunity to develop powers of perception, and observation concerning persons, places, and things. Safe driving techniques and use of equipment are presented. 5(5-0-0)

CJC 220 POLICE ORGANIZATION AND ADMINISTRATION

Introduction to principles of organization and administration, discussion of the service functions, e.g., personnel management, police management, training, communications, records, property maintenance, and miscellaneous services. 3(3-0-0)

CORRECTION ADMINISTRATION CJC 221

Emphasis is placed on the principles of administration in the correctional setting including budgeting and financial control, recruitment and development of staff, administrative decision making, public relations, and other correctional administrative functions.

CJC 223 CORRECTION COUNSELING

This course is designed to provide the student with information pertaining to counseling techniques as they apply to the needs of a correction officer. Time is provided for role playing and other practical techniques.

REHABILITATION CJC 224

This course is designed to provide the student with the opportunity to explore the different avenues of rehabilitation. The new and innovative techniques of rehabilitation will be emphasized as they relate to successful methods. 3 (3-0-0)

CJC 230 COUNSELING

This course is designed to present the basic elements of counseling. The basic elements will be applied to the different socioeconomic groups in our society.

COMMUNITY-BASED CORRECTION CJC 234

Community resources that can be utilized in the correctional process are examined such as vocational rehabilitation, alcohol detoxification and other units, welfare services, child guidance and mental health clinics, employment services, private volunteer, professional assistance, legal aid, and other pertinent services.

SECURITY SYSTEMS CJC 240

This course is designed to introduce the student to an overview of the total security concept. The topic is broken down into industrial, commercial, and retail security. 3 (3-0-0)

- PROPERTY CONTROL CJC 241
 - This course is designed to provide the student with an understanding of the physical layouts and control procedures of industrial, commercial, and retail facilities. Methods of protection such as electrical gates, magnetic passes, perimeter lighting, alarm systems, fencing, and other means of protection are covered.

COMMON CARRIER PROTECTION 3(3-0-0)CJC 242 This course is designed to provide the student with an understanding of various common carrier functions. Effective control measures such as bills of lading, waybills, notices of shipment, and free astray forms are presented as they relate to the security officer's function. ICC regulations as they relate to company policies and state laws are covered.

INDUSTRIAL ACCIDENT INVESTIGATION AND REPORTING 3 (3-0-0) CJC 243 This course is designed to present techniques and procedures that will enable the security officer to adequately investigate an industrial accident and report relevant facts important to the investigation. Familiarization with pertinent phraseology and terms is stressed.

3 (3-0-0)

3(3-0-0)

CJC 244 CIVIL AND CRIMINAL LEGAL RESPONSIBILITY

This course emphasizes the civil and criminal legal responsibility of security personnel. It involves control and supervision of company property including entries and exists. It stresses the legal liability of the individual and of the company.

CJC 245 ELECTRONIC DETECTION AND POLYGRAPH 5 (5-0-0) This course is designed to provide the student with an understanding of electronic detection

devices and equipment. It stresses the legal aspects limiting their use. The use of the polygraph as an investigative aid is covered.

CJC 246 SECURITY INVESTIGATION

This course is designed to familiarize the student with utilization of personnel security questionnaires and other sources of background data to assure complete investigations. Familiarization with investigative techniques and procedures are emphasized.

CJC 247 **RETAIL SECURITY**

This course is designed to familiarize the student with information concerning all aspects of retail security protection. Internal safeguards including employee and customer activities are covered. CJC 248 FIRE PREVENTION AND SECURITY 3(3-0-0)

This course presents information on the different types of fires and their prevention. Types of fire extinguishers and fire alarm systems are presented. Methods of organizing and training fire brigades are stressed.

CJC 249 SURVEILLANCE TECHNIQUES

This course is designed to cover all types of surveillance techniques and the use of the surveillance equipment. Emphasis is placed on loss prevention in relation to employee and customer activities in industrial, commercial, and retail settings.

DRAFTING

ELECTRONIC DRAFTING **DFT 113**

4 (1-6-0) The fundamentals of drafting are presented with an emphasis on applications in the electronics field. Basic skills and techniques are included such as the use of drafting instruments, types of drawings, construction of drawings both with instruments and freehand, lettering and dimensioning, and how to read prints. In addition to basic skills, specialized experience will be included which directly relates to the electronics industry, such as types of drawings common to electronics, special symbols used, schematic diagrams and layout diagrams with an emphasis on printed circuit work.

ARCHITECTURAL DRAFTING DFT 151

The purpose of this course is to provide basic instruction in preparing architectural working drawings and to serve as a future reference for design and construction principles and methods. It is intended to help the student develop the necessary technical skills which will enable him to communicate and express his architectural ideas in an understandable, efficient, and accurate manner.

DFT 1001 **DRAFTING I**

6 (3-0-9) This course is an introduction to drafting and the study of drafting practices. Instruction is given in the selection, use and care of drawing instruments, lettering styles with special emphasis on Gothic single-stroke lettering, geometric construction, and sketching techniques consisting of orthographic projection and all types of pictorial. Instrument drawing of orthographic projection and dimensioning practices are fully developed. Methods of reproducing and control of drawings are explored.

DFT 1002 **DRAFTING II**

> This course includes the application of orthographic projection principles for the more complex drafting problems, in-depth study of dimensioning and note practices as applied to the American Standards Association practices, primary and secondary auxiliary views, simple and successive revolutions and their applications to practical problems and an introduction to sections and conventions. Prerequisite: DFT 1001 or permission of instructor.

DFT 1003 MECHANICAL DRAFTING I

A thorough knowledge of manufacturing processes and methods will be gained through a unit on shop processes. Intersections and developments will be studied by relating drawings to the sheet metal trades. Models of the assigned drawings will be made from construction paper, cardboard, or similar materials as a proof of the solution to the problems drawn. Geometric tolerancing and methods of drawing axonometric, oblique, and perspective drawings will be studied. Principles of good design and working drawings will be developed. Prerequisite: DFT 1002.

3 (2-2-0)

6 (3-0-9)

6(3-0-9)

3 (3-0-0)

3 (3-0-0)

DFT 1004 ARCHITECTURAL DRAFTING	6 (3-0-9)
This course is an introduction to architectural drafting. Construction det	tails and design will be
studied and working drawings will be prepared from preliminary sketches. F	HA standards, building
codes, and cost estimates will be studied. Prerequisite: DFT 1001 or permi	ission of instructor.
DFT 1104 BLUEPRINT READING	2 (1-0-3)
Interpretation and reading of blueprints. Information on the basic principles	of the blueprint: views,
dimensioning procedures and notes. DFT 1105 BLUEPRINT READING: MECHANICAL	
	1 (0-0-3)
Interpretation of blueprints as they are used in industry; study of prints	supplied by industry;
making plans of operations; introduction to drafting room procedures; sk passing on ideas, information and processes.	tetching as a means of
DFT 1110 BLUEPRINT READING: BUILDING TRADES	0 (1 0 0)
Principles of interpreting blueprints and specifications common to the bu	2 (1-0-3)
ment of proficiency in making three view and pictorial sketches. Prerequis	ite: Nono
DFT 1113 BLUEPRINT READING: ELECTRICAL	1 (0-0-3)
Interpretation of schematics, diagrams and blueprints applicable to elect	
emphasis on electrical plans for domestic and commercial buildings.	Sketching schematics
diagrams, and electrical plans for electrical installations using appropria	
according to the applicable codes will be a part of this course. Prerequisite:	DFT 1110 or DFT 1104.
DFT 1116 BLUEPRINT READING: AIR CONDITIONING	1 (0-0-3)
A specialized course in drafting for the heating, air conditioning and refrige	
sis will be placed on reading of blueprints that are common to the trade; bl	
components, assembly drawings, wiring diagrams and schematics, floor pla	
The student will make tracings of floor plans and lay out air conditioning	systems. Prerequisite:
DFT 1110.	
DFT 1117 BLUEPRINT READING: WELDING	3 (3-0-0)
A thorough study of trade drawings in which welding procedures are indica	
and application of welding symbols, abbreviations, and specifications. Pre DFT 1118 PATTERN DEVELOPMENT AND SKETCHING	1 (0-0-3)
Continued study of welding symbols; methods used in layout of sheet steel	\ /
jigs and holding devices involved in welding. Special emphasis is placed of	· · · · ·
angle layouts by the use of patterns and templates. Prerequisite: DFT 1117	
DFT 1121 DRAFTING I	8 (4-0-12)
This course is an introduction to the field of drafting and the study of drafting	g practices. Instruction
is given in the selection, use and care of drawing instruments, lettering styles	s with special emphasis
on Gothic single-stroke lettering, geometric construction, free-hand sketchi	
ing of orthographic instrument drawing (principal views). Methods of repr	oducing and control of
drawings are explored.	
DFT 1122 DRAFTING II	6 (4-0-6)
This course includes the application of orthographic projection principles	
drafting problems, an in-depth study of dimensioning and note practices, p auxiliary views, simple and successive revolutions and their applications to	
an introduction to sections and conventions. Prerequisite: DFT 1121 or pe	
DFT 1125 DESCRIPTIVE GEOMETRY	3 (2-0-3)
A graphic analysis of space problems. Involving points, lines, planes, connection	` /
tion of these. Practical design problems are stressed with analytical verifica	
Visualization is stressed on every problem. Prerequisite: DFT 1121, MAT 1	
DFT 1131 MECHANICAL DRAFTING I	7 (3-0-12)
An introduction to mechanical drafting beginning with problems concern	ing precision and limit
dimensioning, methods of fastening materials, and fasteners: keys, spring	
Intersections and developments will be studied by relating drawings to t	
Models of the assigned drawings will be made from construction paper,	
materials as a proof of the solution of the problems drawn. Included will	be an introduction to
electrical diagrams and piping drawings. Symbols will be studied and d	rawings will be made
involving these items. Prerequisite: DFT 1122.	7 (3-0-12)
DFT 1132 MECHANICAL DRAFTING II	· · · · · ·
Methods of drawing and projected axonometric, oblique, and perspective d with emphasis on the practical applications of pictorial drawings. Various m	nethods of shading will
be introduced. The study of precision dimensioning, preparation of set	of working drawings.
assembly drawings, detail drawings and parts lists. Included will be a brief i	ntroduction to compu-
ter graphics, topographical drawings and mapping, and graphs and charts. F	Prerequisite: DFT 1131.

DRAMA

DRAMA APPRECIATION DRA 151

An introductory course in drama, with overviews of the history of the theater, and various aspects of play production. Particular attention is given to the actor's understanding and exercise of basic skills and techniques. The course is designed to develop imagination, self-awareness, and the ability of improvisation. Work in individual and group projects.

ECONOMICS

MACROECONOMICS ECO 251

The economic analysis of the economy as a whole. It includes such areas of study as total employment, total production, the business cycle, the general price level, and measures used to stabilize the level of business activity. 5 (5-0-0)

MICROECONOMICS ECO 252 The economic analysis of the problems of individuals, firms, and industries. It includes such areas

as price determination, forces of supply and demand, competition, monopoly, and profit maximization. Prerequisite: ECO 251 or permission of the instructor.

EDUCATION

EDU 100 INSTRUCTIONAL MEDIA A study of the school media center, the course will include basic library techniques, operation and

care of audiovisual equipment, proper use of and production of audiovisual materials. 1 (0-0-10) EDU 101 **TEACHER'S AIDE INTERNSHIP** Each student will work for three quarters in an Iredell County school as a teacher's aide, assisting teachers in actual classroom work. Interns may work either at the kindergarten, elementary, or junior high level, and will assist the teachers in clerical work and instruction, as well as spending

- some time in observing classroom instructional strategies. **TEACHER'S AIDE INTERNSHIP** EDU 102 A continuation of EDU 101. EDU 103 **TEACHER'S AIDE INTERNSHIP**
- A continuation of EDU 102.

EDU 261 INTRODUCTION TO EDUCATION A survey of various phases of education and teaching. The course provides an introduction to the fundamental principles, techniques and procedures, objectives, and historical views in education. It is designed primarily for students entering the teaching profession.

ELECTRICITY

ELECTRICAL FUNDAMENTALS I ELC 112

A qualitative study of units of measurement, electrical quantities, simple circuits, electromotive forces, current, power, laws, basic electrical instruments and measurements, resistance, impedance and basic circuit components. Concepts taught are generally limited to fundamentals with very little emphasis placed on quantitative aspects. Laboratory work will teach the proper use and care of basic hand tools and the basic manual skills used in working with electricity. Measurement techniques and safety practices will be stressed throughout.

ELECTRICAL FUNDAMENTALS II ELC 113 A continuation of ELC 112. Introduction to magnetism, alternating current theory, sine wave analysis, inductance, capacitance, reactance, phase relationships, power and transformers. Prerequisite: ELC 112.

ELECTRICAL MACHINES I ELC 211

Principles, construction, characteristics, applications and control of direct current motors and generators. A study of AC motors and generators and speed control. Introduction to single phase and three phase power distribution, transformers, wye and delta connections and power instrumentation. Prerequisites: ELC 112, ELC 113.

SOLID STATE CONTROLS 4 (3-3-0) **ELC 222** Introduction to static switching circuits and controls. Boolean algebra, static switching applications involving logic components, and design of control circuits. Dynamic controls involving solid state devices such as the transistor, integrated circuit, and digital readout. Minicomputers and their relationship to the control of machines and manufacturing processes will be studied. Prerequisite: ELN 219.

3 (3-0-0)

ELC 1001 DIRECT AND ALTERNATING CURRENT

6 (3-0-9) The course includes a study of the electrical structure of matter and electron theory, the relationship between voltage, current, and resistance in series, parallel, and series-parallel circuits, an analysis of direct current circuits by Ohm's law and Kirchoff's law. A study of the sources of direct current voltage potential, fundamental concepts of alternating current flow; reactance, impedance, phase angle, power, and resource are also studied.

ALTERNATING CURRENT AND DIRECT CURRENT ELC 1002 MACHINES AND CONTROLS

6 (3-0-9) The course provides fundamental concepts in single and polyphase alternating currents, voltages, power measurements, transformers, and motors. Instruction in the use of electrical test instruments in circuit analysis, the basic concepts of AC and DC machines, and simple system controls are also presented. Prerequisite: ELC 1001 or approval of instructor.

ELC 1003 RESIDENTIAL WIRING

6 (3-0-9) The course provides instruction and application in the fundamentals of blueprint reading, planning, layout, and installation of wiring in residential applications. This will include services, panel board, lighting, fusing, wire sizes, and the study of related areas of the National Electric Code. Prerequisite: ELC 1001 or approval of instructor.

- ELC 1004 COMMERCIAL AND INDUSTRIAL WIRING 6 (3-0-9) The course includes the study of layouts, planning and installation of wiring systems in commercial and industrial complexes with some emphasis upon blueprint reading and symbols. This will include national electric code, fundamental application of practical installations of wiring, and conduit preparation of simple systems. Prerequisite: ELC 1001 or approval of instructor.
- ELC 1005 A/C, D/C MACHINES AND CONTROLS 6 (3-0-9) This course will be a basic introduction of the electrical structure of matter and electron theory with a fundamental approach to the concept and analysis of A/C and D/C machines and single system controls by hands-on experiences in the lab.

DIRECT AND ALTERNATING CURRENT ELC 1112

9 (5-0-12) A study of the electrical structure of matter and electron theory, the relationship between voltage, current, and resistance in series, parallel, and series-parallel circuits. An analysis of direct current circuits by Ohm's Law and Kirchoff's Law. A study of the sources of direct current voltage potentials. Fundamental concepts of alternating current flow, reactance, impedance, phase angle, power, and resonance. Analysis of alternating current circuits. Prerequisite: None.

ELC 1113 ALTERNATING CURRENT AND DIRECT CURRENT

MACHINES AND CONTROLS

Provides fundamental concepts in single and polyphase alternating current circuits, voltages, currents, power measurements, transformers and motors. Instruction in the use of electrical test instruments in circuit analysis. The basic concepts of AC and DC machines and simple system controls. An introduction to the type control used in small appliances such as thermostats, times, or sequencing switches. Prerequisite: ELC 1112 or permission of instructor.

ELC 1124 RESIDENTIAL WIRING

Provides instruction and application in the fundamentals of blueprint reading, planning, layout, and installation of wiring in residential applications such as services, switchboards, lighting, fusing, wire sizes, branch circuits, conduits, National Electrical Code regulations in actual building mock-ups.

COMMERCIAL AND INDUSTRIAL WIRING ELC 1125

Layout, planning, and installation of wiring systems in commercial and industrial complexes, with emphasis upon blueprint reading and symbols, the related National Electrical Codes, and the application of the fundamentals to practical experience in wiring, conduit preparation, and installation of simple systems. Prerequisite: ELC 1124 or permission of instructor.

ELECTRONIC DATA PROCESSING

3 (3-0-0) LOGIC AND DECISION MAKING EDP 101 An introductory course in programming logic. The study of re-evaluation of a problem through problem analysis, developing algorithms and flowcharting. Prerequisite: EDP 151, or taken concurrently with EDP 151, or permission of the instructor.

3(3-0-0)**EDP 103** UTILITIES An introduction to computer operational software. The student will be familiarized with the basic components and procedures of using an interactive system. Editor use and file copy will be given major emphasis. Prerequisite: EDP 151, EDP 101, or permission of the instructor. 3 (3-0-0)

ADVANCED UTILITIES EDP 104 A continuation of EDP 103 with emphasis on disk file manipulation. Use of Tape as a backup. Screen formating and design. Prerequisite: EDP 103 or permission of instructor.

9 (5-0-12)

8 (5-0-9)

9 (5-0-12)

	The student will gain experience in designing and writing a variety of programs covering importa programming techniques applicable to the business environment. Emphasis will be placed on goo program design and coding. With a firm foundation in program design, the student will be able produce professional quality software. Prerequisite: EDP 103 or currently enrolled in EDP 103.
EDP	203 SYSTEMS ANALYSIS & DESIGN 3 (3-0-
	A course in business systems analysis and design covering its scope, methods, and type
	investigation, feasibility study, justifications for design of input, design of output, and storage
	files. Prerequisites: EDP 107 or EDP 207 or permission of instructor.
EDP	204 ADVANCED SYSTEMS ANALYSIS & DESIGN 3 (3-0-
	A continuation of EDP 203 with emphasis on design of system control, presentation to manage
	ment, testing, debugging, and documentation of a business system. Prerequisite: EDP 203 of permission of instructor.
EDP	
	This course is intended to introduce the student to programming computers for commercial an
	business applications using the COBOL language. The student will obtain experience in solvin practical problems using this language. Prerequisites: EDP 151, EDP 101, and EDP 103 or permission of instructor.
EDP	
	A continuation of EDP 207 which includes an intensive study in coding and programming comple
	business applications using the COBOL language. Prerequisites: EDP 207 or permission of instructor.
EDP	
	The student will select and design a computerized system and its resulting computer programutilizing the RPG or COBOL languages. Prerequisites: EDP 108, EDP 204, EDP 208 or permission of instructor.
	ELECTRONICS
ELN	104 RADIO AND TELEVISION 8 (4-8-0
	A study of the principles of operation of black-and-white and color television. The use of bloc diagrams and schematic diagrams is covered in detail. A large portion of the time is spen troubleshooting sets in the lab. During this extensive troubleshooting, the proper use of ter equipment is learned through signal injection, signal tracing, alignment, convergence, and takin voltage measurements. Also, special emphasis will be placed on covering electronic principles of radio and television servicing to prepare students to pass the Certified Electronics Technician Exam.
ELN	121 ELECTRONICS I 5 (3-4-0
	A study of semiconductor fundamentals to include theory of operation and electrical characteris tics of numerous semiconductor devices. Specific devices will include semiconductor signal an power diodes, zener diodes, tunnel diodes, varactor diodes, bipolar transistors, field effect transis
	tors, thyristors, integrated circuits and optoelectronic devices. Prerequisite: ELC 112.
	26

3 (2-2-0) EDP 155 **BASIC LANGUAGE PROGRAMMING** An introduction to digital computing techniques through the study of the BASIC language. Students learn the techniques of problem solving and program development. Concepts of microcomputer hardware and computer applications areas are introduced. Topics covered include: algo-

majors. Prerequisite: None.

rithms, flowcharting, commands, statements, built-in functions, arrays, and strings. Offered exclusively by Electronics Department. Not for Technical Business Students.

EDP 157 **BASIC PROGRAMMING FOR BUSINESS** 4(3-2-0)The student will gain experience in designing and writing a variety of progra ant od to

E

EDP 107

EDP 151

RPG II

taken concurrently with EDP 103, or permission of the instructor.

EDP 108 ADVANCED RPG II 4 (3-2-0) A continuation of EDP 107 which includes an intensive study in coding and programming of the RPG computer language. Prerequisite: EDP 107 and EDP 103 or permission of instructor.

An introductory course designed to acquaint students with the overall field of data processing. It includes a historical review of data processing, basic terminology, fundamental concepts of data processing, job opportunities and requirements in the D.P. field. The laboratory exercises are devoted to familiarizing students with the basic data processing equipment. This course is designed for students majoring in areas other than data processing as well as data processing

An introduction to RPG II programming. The student will obtain experience in the use of the RPG II

computer language for coding business computer applications. Prerequisite: EDP 101, EDP 151,

INTRODUCTION TO DATA PROCESSING

4 (3-2-0)

4 (3-2-0)

0)

ELN 122 ELECTRONICS II

A continuation of Electronics I with special emphasis on the construction of amplifier circuits, circuit configurations, electrical characteristics and amplifier design procedure. Specific types of circuits will include: basic amplifiers, operational amplifiers, power supplies, oscillators, pulse circuits and modulation systems.

ELN 202 ELECTRONIC COMMUNICATIONS SYSTEMS

7 (5-4-0) A study of electronic communications systems to include: AM, SSB, and FM transmitters and receivers. Specific areas of study will include: amplitude modulation techniques, frequency modulation, antennas, communications test equipment, and broadcast station requirements.

ELN 203 MICROPROCESSORS

7 (4-6-0) A study of microprocessors and microcomputers. Topics covered include: microcomputer basics, number systems and codes, computer arithmetic, introduction to programming, operation of microprocessors, and interfacing techniques. Prerequisite: ELN 219.

INDUSTRIAL ELECTRONICS **ELN 208**

6 (5-2-0) A study of industrial electrical control systems to include starting, stopping, reversing, and speed control for electrical motors. Industrial electronic switching components to include SCR's, UJT's, diacs, relays, and gate controlled circuitry will be covered. Also, transducers to include photocells, temperature sensing devices, pressure gauges, etc. Open and closed loop systems will be considered as well as numerical control.

ELN 219 DIGITAL FUNDAMENTALS

Emphasizes the study of combinational and sequential logic circuits using discrete and integrated components. Topics include: binary arithmetic, numbering systems, Boolean algebra, storing, timing, gating, and counting. Typical applications in industry will be presented. Prerequisite: ELN 122. 6 (4-4-0)

ELN 220 ELECTRONIC SYSTEMS

The course consists of a functional block diagram analysis of a number of digital computer systems. Emphasis is placed on the mini-micro computer variety currently being used in industry. The lab will provide practice in manipulating the hardware and software associated with such computers. Prerequisite: ELN 203.

ELECTRONICS DESIGN PROJECT **ELN** 246

3 (1-4-0) A laboratory class emphasizing independent research and design work by the student. The student will select a project in consultation with the instructor; perform the required research; compile data, formulate a theoretical model; and construct, test, and evaluate a working model of the selected project. Prerequisite: ELN 203.

TROUBLESHOOTING TECHNIQUES **ELN** 1002

An introduction to vacuum tubes and semiconductors with a study of their associated circuitry. Operating characteristics of RF and AF amplifiers. Principles of radio reception and troubleshooting techniques. Prerequisite: ELC 1001 or permission of the instructor.

ELN 1003 **TELEVISION SERVICING**

A study of black-and-white television receivers. Detailed study of all circuits of the TV receiver in classroom and laboratory sessions. Supervised servicing practice to develop skills in using test equipment to repair and maintain television and radio receivers. Prerequisite: ELN 1002 or permission of instructor.

INDUSTRIAL ELECTRONICS **ELN** 1004

6 (3-0-9) Theory of operation of the television circuits peculiar to color receivers. Practical test bench techniques including trouble shooting, alignment, and convergence. Continuation of Radio and Black & White Television Servicing. Prerequisite: ELN 1003 or permission of instructor.

- INDUSTRIAL ELECTRONICS **ELN 1118** Basic theory, operating characteristics, and application of vacuum tubes such as diodes, triodes, tetrodes, pentrodes, power supplied using diodes, and other basic applications.
- INDUSTRIAL ELECTRONICS 5 (3-0-6) **ELN 1119** Basic industrial electronic systems such as motor controls, magnetic amplifier controls, welding control systems using thyratron tubes and other basic types of systems commonly found in most industries. Prerequisite: ELN 1118 or permission of instructor.

ENGINEERING

INTRODUCTION TO GRAPHICS EGR 151

The purpose of this course is to provide beginning instruction in the fundamentals of mechanical drawing and will provide the necessary skills for the future study of mechanical, architectural, engineering or other technical drafting disciplines.

5 (3-4-0)

7 (4-6-0)

6 (3-0-9)

6 (3-0-9)

5 (3-0-6)

for evaluating a design. Units of study include elements of descriptive geometry, advanced orthographic projection, sectional views, auxiliary views, revolutions, and developments and intersections. ENGLISH **ENG 098** DEVELOPMENTAL ENGLISH 3(1-4-0)Designed for students who need a review of basic grammar and composition skills before entering English 101 or 151. Institutional credit only. ENG 101 **GRAMMARI** 3 (3-0-0) A functional course designed to prepare technical students for day-to-day work experiences. Emphasis on grammar, vocabulary, and spelling. ENG 101-5 GRAMMAR 3 (1-4-0) An in-depth study of grammar, vocabulary, and spelling. Designed as a functional course for the technical student. COMPOSITION ENG 102 3 (3-0-0) This course is designed to serve as a transition between ENG 101 and ENG 103. It deals with paragraph and essay development, and reinforces skills - spelling, vocabulary, and grammar. It serves to briefly introduce the rudiments of report writing. ENG 102-5 COMPOSITION 3(1-4-0)This course is designed to serve as a transition between ENG 101 and ENG 103. It deals with paragraph and essay development, and reinforces skills - spelling, vocabulary, and grammar. It serves to briefly introduce the rudiments of report writing. ENG 103 **TECHNICAL WRITING** 3 (3-0-0) A continuation of functional English with an emphasis on the formats of various types of written reports, graphics, and the techniques of planning and organizing the long formal report. Prerequisite: ENG 102 or 102-5. ENG 103-5 **TECHNICAL WRITING** 3 (1-4-0) An in-depth study of the format of various types of written reports, graphics, and the techniques of planning and organizing the formal report. **ENG** 150 INTRODUCTION TO RESOURCE MATERIAL 1(1-0-0)Introduction to the Learning Resources Center and instruction to effective usage of study materials available in the L.R.C. and other sources. ENG 151 COMPOSITION I 3 (3-0-0) A course in expository writing designed to develop purpose and organization. Emphasis on topic sentence, paragraph patterns, formal outline, expository essay. Study of models. Review of grammar and spelling. Prerequisite: Satisfactory score on the English placement test. ENG 151-5 **COMPOSITION I** 3 (1-4-0) A course for college transfer students who score low on English placement test. Includes, in addition to the above, concentrated review of grammar, punctuation, spelling, sentence structure. **ENG 152** COMPOSITION II 3 (3-0-0) Continuation of ENG 151. Essay patterns. Research techniques. Short literary papers. Study of short fiction. Prerequisite: ENG 151 or 151-5. ENG 152-5 COMPOSITION II 3 (1-4-0) For students needing continued review of basic writing skills. Content same as ENG 152. Prerequisite: ENG 151 or 151-5. **ENG 153** COMPOSITION III 3 (3-0-0) Continuation of ENG 152. Literary essays using primary sources. Study of poetry and drama. Prerequisite: ENG 152 or 152-5. ENG 153-5 COMPOSITION III 3(1-4-0)For students needing continued review of basic writing skills. Study of grammar, spelling, punctuation, vocabulary, sentence structure. Literary essays using primary sources. Study of poetry and drama. Prerequisite: ENG 152 or ENG 152-5. MAJOR BRITISH WRITERS ENG 261 5 (5-0-0) A literary and historical study of Chaucer, Shakespeare, and Milton with related writing assignments. Prerequisite: ENG 153. ENGLISH LITERATURE **ENG 265** 5 (5-0-0) A survey of selected 19th and 20th century British authors with collateral readings from each period studied. Prerequisite: ENG 153.

EGR 152

ENGINEERING GRAPHICS

3 (2-2-0) This course will be a continuation of EGR 151. Emphasis is placed on graphical analysis as a means

3 (3-0-0) A continuation of the survey of American literature from the Romantics through the Realists. Prerequisite: ENG 153. AMERICAN LITERATURE III **ENG** 273 3 (3-0-0) A continuation of the survey of American literature from the rise of Naturalism to the present time. Prerequisite: ENG 153. ENG 1102 COMMUNICATION SKILLS 3 (3-0-0) Designed to promote effective communication through correct language usage in speaking and writing. FRENCH FRE 151 ELEMENTARY FRENCH I 5 (5-0-0) A beginning course for students who have never studied French. Much oral work, drill in grammatical principles, written composition, conversation, dictation, and pronunciation are stressed. French 151 and 152 are equivalent to two years of high school French. Senior colleges which require two years of a foreign language for admission normally accept these two courses for entrance credit or for six semester hours elective credit. Prerequisite: None. FRE 152 **ELEMENTARY FRENCH II** A continuation of FRE 151. Prerequisite: One year of high school school French or FRE 151. FRE 251 INTERMEDIATE FRENCH I 5 (5-0-0) A review of grammatical principles, composition, dictation, conversation, and reading. Knowledge of French culture is encouraged through projects and reports. Prerequisite: Two years of high school French or FRE 152. INTERMEDIATE FRENCH II FRE 252 5 (5-0-0) A continuation of FRE 251. This is a study of selective readings from short stories and poetry. A major literary paper and oral report are required. Prerequisite: FRE 251. FRE 261 FRENCH LITERATURE I 5 (5-0-0) A survey of selective literature from the Middle Ages through the 18th Century with related writing assignments. Extensive reading, lectures, and reports in French are required. Prerequisite: FRE 252. FRENCH LITERATURE II 5(5-0-0)FRE 262 A survey of selective literature from the 19th and 20th centures, with related writing assignments. Prerequisite: FRE 252. GEOGRAPHY 5(5-0-0)PHYSICAL GEOGRAPHY **GEO 261** The earth's astronomical relations, factors of weather and climate, and physical features. WORLD REGIONS AND ECONOMIC GEOGRAPHY 5 (5-0-0) GEO 262 Relations of human activities to the larger geographic regions of the world. Geographic factors involved in production, distribution, consumption, and conservation of the major crops, minerals and industries of the world. HEALTH EDUCATION 3 (3-0-0) FIRST AID AND SAFETY **HEA 251** Principles and practices as applied to emergency first aid, safety in the home, school and community.

A critical and historical survey of American literature from the Colonial period through the early

ENG 271

ENG 272

AMERICAN LITERATURE I

AMERICAN LITERATURE II

Romantics. Prerequisite: ENG 153.

PERSONAL HEALTH **HEA 252** The basic biologic and social concepts dealing with individual hygiene, disease, nutrition, mental health, heredity, and family hygiene.

3 (3-0-0) COMMUNITY HEALTH **HEA** 253 The basic principles and problems of contemporary community health and school hygiene are investigated. Topics include health education, recognition, evaluation and prevention of today's health problems, and trends in health.

3(3-0-0)

5(5-0-0)

3(3-0-0)

HISTORY

HISTORY OF WESTERN CIVILIZATION I HIS 151

An eclectic approach to the history of Western Civilization from prehistoric times through the civilization of Egypt, Mesopotamia, Greece, Rome, and Medieval Europe to about 1650. The course is designed to prepare the student for life in the world community by providing him a knowledge of those events of the past which have shaped the present and will influence the future.

HIS 152 HISTORY OF WESTERN CIVILIZATION II A continuation of History of Western Civilization (151) covering the period from 1650 to the present. The course is designed to afford the student an opportunity to examine the major historical forces which have shaped the political, intellectual, material, and cultural setting of the present.

- HIS 161 NORTH CAROLINA HISTORY 5(5-0-0)A survey of the history of North Carolina from the Colonial Era to the present with emphasis on development since the Civil War.
- HIS 251 U.S. HISTORY I

The backgrounds of history, settlement, constitutional development, and union, along with manifest destiny and developing sectionalism. The course covers the period through 1865.

HIS 252 U.S. HISTORY II

> Course covers Reconstruction, the progressive movement, World War I, and American history to the present. The student will become more aware of his nation as a part of the world community through this course.

HIS 261 NINETEENTH CENTURY EUROPE

An in-depth survey of European history from 1815 to 1914. A cause and effect approach is used to trace the growth of nationalism and liberalism, the development of socialism, and the imperalism which brought turbulence throughout much of the century and eventually triggered World War I. TWENTIETH CENTURY EUROPEAN HISTORY

HIS 271 3 (3-0-0) A consideration of the history of twentieth century Europe, beginning with the background of World War I, the political innovations between wars, World War II and its aftermath, and the significant political, social and cultural events which shaped the present. In addition to a factual examination, the student will relate historical events with his own situation.

- HIS 272 **CIVIL WAR AND RECONSTRUCTION** 3 (3-0-0) A study of the American people during the crisis of the war and post-war periods with emphasis on the causes of the war, the national and international impact, and the political, economic and social aspects of the Reconstruction.
- **HIS 273** TWENTIETH CENTURY U.S. HISTORY

A history of the United States from 1932 to the present. Special emphasis is given to the changing political, economic and intellectual aspects of American democracy from the New Deal to the present.

INDUSTRIAL SAFETY

ISC 1101 INDUSTRIAL SAFETY 3 (3-0-0) A study of the overall picture of the accident toll for the nation's population. It is designed to establish safe work habits in performing the occupation. Principles of accident prevention, injury sources and causes, accident costs, job safety analysis, accident investigation, methods of promoting safe practice, safety education and training, first aid, lifting - manually and mechanically, and fire prevention and protection are some of the topics discussed.

MATHEMATICS

MAT 096 DEVELOPMENTAL MATHEMATICS 3 (1-4-0) Designed for students who need a review of the basics before taking MAT 151. Topics include expressing numbers, whole numbers, number theory, fractions, decimals, ratio and proportion, and percentages. Institutional credit only.

- MAT 121 **TECHNICAL MATHEMATICS I** 5(5-0-0)This course is a study of basic algebra and its application to electronics theory. The course is designed for students in the Electronics Engineering Technology program. Topics include operations on algebraic numbers, exponents and radicals, metric prefixes, equations, factoring and fractions quadratic equations, and applications to electrical circuits. Students are introduced to the usage of electronic calculators to solve for a variety of electrical math problems and formulas.
- **TECHNICAL MATHEMATICS II** MAT 122 5 (5-0-0) This course is designed for the Electronics Engineering Technology program. The course is a study of trigonometric functions and their applications to alternating currents. Topics include solutions of triangles and vector problems, periodic functions, phasor algebra, and alternating currents in series and parallel circuits. Prerequisite: MAT 121 or equivalent.

3 (3-0-0)

5 (5-0-0)

5 (5-0-0)

3(3-0-0)

5 (5-0-0)

5 (5-0-0)

functions. Prerequisite: MAT 161 or permission of instructor.	
251 CALCULUS I 5 (5-0-0)	
This beginning course in calculus offers a review of analytical geometry and is a study of the derivative, its inverse, theorems, and applications. Special attention is placed on the ideas of limits and continuity. This course is designed for mathematics, science, or engineering majors. Prerequisite: MAT 161 or three years of high school mathematics.	
252 CALCULUS II 5 (5-0-0)	
A continuation of MAT 251. Includes integration and its applications, conic sections, limits and continuity. Prerequisite: MAT 251.	
253 CALCULUS III 5 (5-0-0)	
A continuation of MAT 252. The course includes exponential and logarithmic integration and differentiation, parametric equations, polar coordinates, methods of integration and further applications of the integral. Prerequisite: MAT 252.	1
1101 ESSENTIALS OF MATHEMATICS 5 (5-0-0)	
Practical number theory is the basis for this course. Analysis of basic operations; addition, subtrac- tion, multiplication, and division are included. Other topics studied are fractions, decimals, powers and roots, percentages, ratio and proportion. Some work with solid and plane geometric futures is undertaken as well; specifically, determinations of volume and surface areas. Extensive practice is required. The student is also exposed to basic algebra.	
1102 ALGEBRA 5 (5-0-0)	
A presentation of basic concepts and operations of algebra; algebraic operations; addition, sub- traction, multiplication, and division; fractions, letter representation, grouping, factoring, ratio and proportion, graphical and algebraic solution of first degree equations; solution of simultaneous equations by addition and subtraction; substitution, graphing exponents, logarithms, tables and interpolation, and slide rule. Prerequisite: MAT 1101.	
1103 APPLIED TRIGONOMETRY 3 (3-0-0)	
This course is designed to meet the needs of drafting students who will later apply trigonometric principles to surveying. Topics studied will include determining the area and volume of irregular figures, applying given formulas to calculate the radius of an inscribed or circumscribed circle, conversion between different units of area and volume, use of logarithms, solving triangles by trigonometric relationships, converting between rectangular and polar coordinates and graphing of the trigonometric functions. Prerequisite: MAT 1102.	
1115 ELECTRICAL MATHEMATICS 5 (5-0-0)	
An introductory algebra course with vectors needed in alternating current. Algebraic operations of addition, subtraction, multiplication, and division; use of letters and signs, grouping, factoring, exponents, ratios, algebraic and graphic solutions of equations, introduction to graphs, right triangles and vectors.	
31	

bility distributions, elements of sampling, correlation, prediction, tests of hypothesis. Offered on

A brief treatment of basic concepts of differential and integral calculus with applications to business, economics and the social and life sciences; polynomial, exponential and logarithmic

sets of numbers, properties of real numbers, polynomials, equations, inequalities, and graphs.

MECHANICS

6(3-0-9)MEC 1001 MACHINE SHOP THEORY AND PRACTICE I Machine Practice I is designed to acquaint the student with machine shop safety rules, regulations, and practices; the use and care of basic machine shop tools and instruments; and the operation of common machines used in the machine shop trades.

6 (3-0-9) MEC 1002 MACHINE SHOP THEORY AND PRACTICE II A continuation of Machine Practice I to further develop knowledge and skill in the use of lathes, drills, grinders, and milling machines. Prerequisite: MEC 1001 or permission of instructor.

- MEC 1003 MACHINE SHOP THEORY AND PRACTICE III 6 (3-0-9) Basic Machine Practice II is a course designed to further develop knowledge of machines, shop practices, safety procedures, and the application of tools, instruments, and equipment. Prerequisite: MEC 1002 or permission of instructor.
- MACHINE SHOP THEORY AND PRACTICE IV 6 (3-0-9) MEC 1004 In this course lecture and laboratory will be coordinated to provide extended knowledge and experience in operations as related to production and quality controls; specialized applications of various machines, and general machine shop support. Laboratory practice will enable the student to develop a high degree of operation skill on selected machines. Prerequisite: MEC 1003 or permission of instructor.
- MACHINE SHOP THEORY AND PRACTICE I 7 (3-0-12) MEC 1101 An introduction to the machinist trade and the potential it holds for craftsmen. Deals primarily with the identification, care and use of basic hand tools and precision measuring instruments. Elementary layout procedures of lathe, drill press, grinding (off-hand) and milling machines will be introduced both in theory and practice.
- MEC 1102 MACHINE SHOP THEORY AND PRACTICE II 7 (3-0-12) Advanced operations in layout tools and procedures, power sawing, drill press, surface grinder, milling machine shaper. The student will be introduced to the basic operations on the cylindrical grinder and will select projects encompassing all the operations, tools and procedures thus far used and those to be stressed throughout the course. Prerequisite: MEC 1101 or permission of instructor.
- **MEC 1103** MACHINE SHOP THEORY AND PRACTICE III 7 (3-0-12) Advanced work on the engine lathe, turning, boring and threading machines, grinders, milling machine and shaper. Introduction to lathing, cutting and measuring of spur, helical, and worn gears and wheels. The trainee will use precision tools and measuring instruments such as vernier height gages, protractors, comparators, etc. Basic exercises will be given on the turret lathe and on the tool and cutter grinder. Prerequisite: MEC 1102 or permission of instructor.

MEC 1104 MACHINE SHOP THEORY AND PRACTICE IV 7 (3-0-12) Development of class projects using previously learned procedures in planning, blueprint reading, machine operations, final assembly and inspection. Additional processes on the turret lathe, tool and cutter grinder, cylindrical and surface grinder, advanced milling machine operations, etc. Special procedures and operations, processes and equipment, observing safety procedures faithfully and establishment of good work habits and attitudes acceptable to the industry. Prerequisite: MEC 1103 or permission of instructor.

MEC 1110 MACHINE PROCESSES I 3 (2-0-3) An introduction to basic machine operations in relation to manufacturing processes and drafting. Deals primarily with the identification, care and use of basic hand tools and precision — measuring instruments. Elementary layout procedures and processes of lathe, drill press, grinding (off-hand) and milling machines will be introduced both in theory and practice. Safety in the shop is stressed. MEC 1111 MACHINE PROCESSES II 3(2-0-3)Advanced operations in layout tools and procedures, lathe, power saw, drill press, surface grinder, milling machine shaper. The student will complete selected projects encompassing all the opera-

Prerequisite: MEC 1110 or permission of instructor. **MEC 1115** PHYSICAL METALLURGY 4(3-0-3)Investigates the physical properties and characteristics of various ferrous metals and non-ferrous metals and their alloys and methods used to change those properties and characteristics to better serve industrial purposes. Instruction will include methods of changing physical characteristics and properties, methods of production, methods of shaping and forming, heat and surface treatments, and classification of ferrous and nonferrous metals. Prerequisite: PHY 1101 or permission of instructor.

tions, tools, and procedures thus far used and those to be stressed throughout the course.

site: DFT 1110, AHR 1123. HEAT TREATMENT MEC 1126 Working knowledge of the methods of treating ferrous and non-ferrous metals. The effects of hardening, tempering, and annealing upon the structure and physical properties of metals. Trainees will be given the opportunity to acquaint themselves with the equipment and processes of heat training. **MEC 1133** MECHANICAL MAINTENANCE

To acquaint the student with the basic fundamentals of installation, maintenance and repair of machines. Miscellaneous electrical, mechanical, hydraulic, pneumatic, and lubrication devices are installed and maintained. Methods of rigging and machine installation, including location, leveling and fastening are covered. The use of precision measuring tools and checking for accuracy, squareness, and correct center line distances are stressed for pre-start inspection. Prerequisite: MEC 1101, DFT 1104, DFT 1113.

MEC 1140 HYDRAULICS — FUNDAMENTALS

3 (3-0-0) This course is arranged to give the student a general knowledge of the basic components of hydraulic systems, as well as a general understanding of the basic laws and formulas used in simple hydraulic calculations. Topics included are: the use of standard hydraulic symbols, pumps, control valves, control assemblies, actuators, and basic maintenance procedures.

MUSIC

MUS 149 INTRODUCTION TO SIGHT SINGING

2 (2-0-0) This course is designed for pre-music majors or other interested persons with little or no background in sight reading music. Solfege or moveable "do" is used to study the melodic and rhythmic elements of music using different keys, tempos and meters. Initially, emphasis is placed on scalewise passages and triads but gradually progresses to more difficult melodies.

- MUS 150 INTRODUCTION TO MUSIC THEORY 3 (3-0-0) This course is designed for pre-music majors with little or no music theory background or nonmusic majors. Topics included are staff, notes, octave placement, clefs, scales (major and minor), rhythm, rhythmic notation, and meter signatures.
- MUSIC THEORY I MUS 151

3 (3-0-0) A coordinated course combining the study of notation, clefs, modes, scales, intervals, and triads. Elementary structure of music such as motive, phrases, cadences. Must be taken concurrently with Music 154.

MUS 152 MUSIC THEORY II

3 (3-0-0) A continuation of MUS 151 with the following additions: principles of part writing, elementary survey of music literature for form and analysis. Must be taken concurrently with MUS 155. Prerequisite: MUS 151.

MUS 153 MUSIC THEORY III

A continuation of MUS 152 with the following additions: introduction of seventh chords and the study of non-harmonic tones. Must be taken concurrently with MUS 156. Prerequisite: MUS 152. SIGHT-SINGING AND DICTATION I 2(2-0-0)MUS 154

The study of melodic and rhythmic elements of music using the moveable "do." Rhythmic and melodic dictation involving scale, and major and minor intervals. Emphasis on hearing mentally what is seen. Must be taken concurrently with MUS 151. 2(2-0-0)

SIGHT-SINGING AND DICTATION II **MUS 155** A continuation of MUS 154. Must be taken concurrently with MUS 152. Prerequisite: MUS 154. SIGHT-SINGING AND DICTATION III 2(2-0-0)MUS 156

A continuation of MUS 155. Must be taken concurrently with MUS 153. Prerequisite: MUS 155. 1(0-5-0)**MUS 160** CHOIR I

The choir offers extensive training in choral technique, part singing, and interpretation. At various times during the year concerts and other programs are presented in the Statesville area: at Mitchell, in churches, and in high schools, according to ability and progress of the group, as determined by the director. Each prospective member must be auditioned and approved by the director. 1(0-5-0)

MUS 161 CHOIR II A continuation of MUS 160.

MEC 1120 DUCT CONSTRUCTION AND MAINTENANCE

and regulators, diffusers, heater and air washers, fans, insulation and ventilating hoods. Prerequi-

Study of various duct materials including sheet steel, aluminum, and fiber glass. Safety, sheet metal hand tools, cutting and shaping machines, fasteners and fabrication practices, layout methods, and development of duct systems. The student will service various duct systems and perform on-the-site repairs including ducts made of fiber glass. A study is made of duct fittings, dampers

MUS 290 BAND ENSEMBLE	1 (0-3-0)
A continuation of MUS 289.	
MUS 291 BRASS AND WOODWIND INSTRUMENTS	1 (1-6-0), 2 (1-9-0), or 3 (1-12-0)
A more intensive study of proper instrument technique and a	ppropriate materials and literature.
Prerequisite: MUS 193.	
MUS 292 BRASS AND WOODWIND INSTRUMENTS	1 (1-6-0), 2 (1-9-0), or 3 (1-12-0)
A continuation of MUS 291. Prerequisite: MUS 291. MUS 293 BRASS AND WOODWIND INSTRUMENTS	
	1 (1-6-0), 2 (1-9-0), or 3 (1-12-0)
A continuation of MUS 292. Prerequisite: MUS 292.	

*Private lessons are open to full-time students only, with first preference given to music majors. Classes are designed for students who are not music majors.

NURSING

NUR 101 FUNDAMENTALS OF NURSING

8 (5-2-6) This course acquaints the student with basic nursing theory and skills with an overall emphasis in meeting patient needs through the life span. The student is introduced to each of the major concepts in the conceptual framework of the program. The nursing process, man's basic needs and body systems are the primary concepts. Developmental theories throughout the life span, communication skills, stress-adaptation theory, the health-illness continuum, and the nurse's role are all introduced as basic concepts utilized in nursing care. Provisions are made for the application of classroom knowledge and skills in an on-campus laboratory and in the hospital setting. The student is expected to develop a beginning confidence in the performance of skills utilizing appropriate techniques. Prerequisites: None.

NUR 111 MEDICAL/SURGICAL NURSING I

12 (7-2-12) This course emphasizes the use of communication skills and the nursing process in helping patients meet their basic needs and cope with the stresses of surgery, integumentary, musculoskeletal, and gastrointestinal disorders throughout the life span with a concentration on disorders of the adult. Clinical experience is integrated with theory to give students the opportunity to achieve increased skills in the performance of selected nursing procedures. The use of the nursing process is stressed in the clinical area. Clinical activities are designed to reinforce classroom learning. Prerequisites: PSY 151, BIO 252, NUR 101.

NUR 112 MEDICAL/SURGICAL NURSING II

This course emphasizes the use of communication skills and the nursing process in helping patients meet their basic needs and cope with the stresses of cardiovascular, fluid/electrolyte balance, respiratory, endocrine and reproductive disorders throughout the life span with a concentration on disorders of the adult. Clinical experience is integrated with theory to give students the opportunity to achieve increased skills in the performance of selected nursing procedures. The use of the nursing process is stressed in the clinical area. Clinical activites are designed to reinforce classroom learning. Prerequisite: NUR 111, BIO 253.

NUR 113 MEDICAL/SURGICAL NURSING III

10 (6-0-12) This course emphasizes the use of communication skills and the nursing process in helping patients meet their basic needs and cope with the stresses of neurological and renal disorders throughout the life span with a concentration on disorders of the adult. In addition, the course stresses the specialized needs of the oncological and critically ill patient. Clinical experience is integrated with theory to give students the opportunity to achieve increased skills in the performance of selected nursing procedures. The use of the nursing process is stressed in the clinical area. Clinical activities are designed to reinforce classroom learning. Prerequisites: NUR 112, BIO 254.

NUR 212 PEDIATRIC NURSING

This course is designed to present content relevant to the nursing care of children with major health problems. The various topics are organized to show how the nursing process is used to meet the needs of children from infancy through adolescence. Prerequisites: PSY 262, NUR 113 and BIO 255 10 (6-0-12)

NUR 213 **OBSTETRICAL NURSING**

This course is designed to present content relevant to the nursing needs and care of childbearing families. The various topics are organized to show how the nursing process can be used to meet the needs of patients from conception through the newborn period. Prerequisites: BIO 255, NUR 113 and PSY 262.

PSYCHIATRIC NURSING NUR 214

The course deals with the role of the nurse in the care of the emotionally disturbed individual who may or may not be confined to a hospital at some point in his illness. The concept of stress as a factor in mental health is recognized and the difficulties that are experienced by various age groups are explored. A variety of treatment modalities and approaches are examined. The theories of personality development as taught by the social sciences are reviewed and utilized. The history of the management of care for individuals with emotional problems is covered as well as current trends in delivery of care and legal aspects of psychiatry. Prerequisites: NUR 113, 212 and 213; PSY 264.

LEADERSHIP AND TRENDS IN NURSING **NUR 215**

The course emphasizes the leadership role of the registered nurse. Current trends, transitional concerns and the need for continuing education are emphasized. Ethics, accountability, and legal aspects of practice are discussed. Transition to the role of the graduate is stressed. Prerequisites: NUR 113, 212 and 213.

7 (4-0-9)

10 (6-0-12)

10 (6-0-12)

6 (3-0-9)

NUR 1101 **BASIC SCIENCE**

A basic knowledge of physical and chemical principles and their application to medicine and/or nursing. Development of understanding of human anatomical structures, physiological processes and their relation to each other through lecture and laboratory practice. Brief study of microbiology, the identification, growth, environment, and control of microorganisms.

NUR 1102 FUNDAMENTALS OF NURSING 8 (6-2-4) An introduction to the basic principles underlying effective and safe nursing care utilizing the nursing process. The holistic concept of man and Maslow's heirarchy underlies the nursing care. Emphasis placed on preventive and restorative nursing care and the rationale underlying the actions taken.

MEDICAL/SURGICAL NURSING I NUR 1104

An introduction to concepts basic to the understanding of the health-illness continum; the relationship of the body and mind to health; a discussion of commonly abused substances; and the management of common emergency situations. Development of an understanding of the aging process, the needs of the geriatric patient, and how these needs translate into nursing care problems. An understanding of the problems and nursing care needs of patients with dysfunction of the endocrine system, cardiovascular system, reproductive system, and various illnesses which may produce disfigurement. Clinical experience is integrated with classroom theory to give students the opportunity to achieve beginning skills in the performance of selected nursing procedures. Experience in planning, meeting and charting some simple needs of hospitalized patients. Prerequisites: NUR 1101, 1102, NUT 151.

NUR 1106 PHARMACOLOGY

A study of safe techniques for oral and parenteral drug administration. Knowledge of drug sources, methods of preparation and storage. Also gain knowledge of equipment, skill in use of sterile technique used in preparation and giving injectable medication. Classification of drugs by use and content. Review of adding, subtracting, multiplying fractions and decimals. Systems and from system to system. Legal aspects of medication preparation. Prerequisites: NUR 1101, 1102, NUT 151.

NUR 1107 MATERNAL/CHILD NURSING

Basic anatomy of the male and female reproductive systems. Presentation of modern aspects of maternity nursing. The nursing care of the normal obstetrical patient and newborn child; detailed nursing care of patients during antepartum, labor, and postpartum periods. Care of patients with complications associated with pregnancy, and care of the premature infant. Emphasis on provision of better and safer nursing care of the expectant mother and child. Following the maternity component, a comparison of normal growth and development patterns of the child from the newborn period through adolescence. Examination of the physical differences between the child and the adult; the effects of hospitalization for common pediatric disorders. Clinical experience is integrated with classroom theory to provide students with continued practice in psychomotor skills and problem solving. Experience in planning, meeting and charting simple needs of obstetric and pediatric patients. Prerequisites: NUR 1104, 1106, PSY 151.

NUR 1109 MEDICAL/SURGICAL NURSING II

16 (10-0-18) Continuation of NUR 1104 providing principles and concepts of simple and complex rehabilitative nursing. Providing the student with opportunity to develop additional knowledge and skill necessary to meet the needs of the more dependent patient. Clinical experience is integrated with classroom theory to give students continued opportunity to develop skill in utilizing the nursing process. Experience, planning, meeting and charting more complex needs of hospitalized patients and also concepts of rehabilitative nursing. Prerequisite: NUR 1107.

VOCATIONAL ADJUSTMENTS NUR 1111

3 (3-0-0) A study of the legal and ethical responsibilities of the LPN. Discussions are centered around opportunities for employment and the obligations assumed upon employment. North Carolina nursing law and professional organizations are discussed. Prerequisite: NUR 1107.

NUTRITION

NUT 151 NUTRITION

3 (3-0-0) Development of understanding of the basic concepts of normal nutrition and how these interrelate to meet the needs of normal individuals throughout the life span. An appreciation of how illness affects the nutritional needs of the body and the basic principles related to dietary treatment of various common disorders.

16 (10-0-18)

3 (3-0-0)

12 (8-0-12)

5 (4-2-0)

ORIENTATION

ORI 150 COLLEGE ORIENTATION

College Orientation will emphasize study skills: taking effective notes, reading and marking textbooks, and studying for and taking examinations. Supportive skills (concentration and retention) and specialized skills (studying science, mathematics, and foreign language) will also be covered. In addition, the student will be introduced to time management and use of the library.

PHILOSOPHY

PHI 151 INTRODUCTION TO ETHICAL DECISION MAKING This course will have two major parts to it. Approximately one-third

This course will have two major parts to it. Approximately one-third of the course will be devoted to a quick survey of various philosophical approaches to ethical decision making. The remaining two-thirds of the quarter will be devoted to a study of contemporary philosophical issues. The purpose of the course is to enable the student to see and understand the dimensions of ethical discourse and thereby make rational ethical decisions.

PHOTOGRAPHY

PHO 1135 PHOTOGRAPHY FOR PRINTERS

A beginning course in photography for printing students. Areas included are operation of a camera, developing film, printing pictures by contact and projection, and methods of lighting.

PHYSICAL EDUCATION

Each physical activity course may be repeated as often as the student desires, but the same physical activity course will be counted only twice for graduation.

The physical education program of activity courses has been designed to give the student knowledge of a program to carry with him when he leaves school and to aid in his physical conditioning while he is in school. For these reasons, credit by examination may not be given for activity courses.

The College does not provide transportation to any off-campus Physical Education activ	rity.
PED 150 ARCHERY	1 (0-2-0)
A course designed to teach the student the fundamental skills of the target bow and an	row.
PED 151 BADMINTON	1 (0-2-0)
A course designed to teach the student the rules, regulations and fundamental skills of ba	adminton.
PED 152 BALLET AND MODERN DANCE	1 (0-2-0)
An introduction to the fundamentals and techniques of ballet and modern dance.	
PED 153 BASKETBALL	1 (0-2-0)
A course designed to teach the students basic basketball technique with emphasis place	· · ·
regulations and fundamental skills.	,

POLITICAL SCIENCE

AMERICAN NATIONAL GOVERNMENT POL 251

A survey course covering the organization and role of the Executive, Legislative and Judicial branches of the Federal Government, emphasizing such areas as business, national security, civil rights, the relationship between the American people and their political institutions, the electoral process, interest groups, and the international commitments of the United States.

POL 261 STATE AND LOCAL GOVERNMENT

A study of the organization, functions and powers of state, county, and local governments in the United States, with emphasis on the state of North Carolina.

POL 271 INTERNATIONAL RELATIONS

A study of basic forces underlying the conduct of international relations and the formation of foreign policy, with emphasis on the role of the United States in its relations with major areas of the world today.

COMPARATIVE GOVERNMENT 3 (3-0-0) POL 272 An intensive study of the political structure of various nations, including some nations from Asia, Europe, Africa, Latin America, as well as the United States.

POL 274 CONSTITUTIONAL LAW 3 (3-0-0) A study of the development of American Constitutional Law chiefly through judicial opinion, with emphasis on freedom of speech, rights of persons accused of crime, civil liberties, and separation of church and state.

PSYCHOLOGY

PSY 150 CAREER AND LIFE PLANNING

This course is designed to broaden the students' understanding of himself, his potential, and related factors which contribute to personal satisfaction. Emphasis is placed on clarifying current values, interests, and personality styles so that these factors may be carefully considered in learning to set personal goals, develop career decision-making skills, and acquire techniques for self-management.

PSY 151 INTRODUCTION TO PSYCHOLOGY

A study of general psychology as a behavioral science. The course introduces the students to such areas as the history and systems of psychology, sensation, perceptions, learning, emotions, motivation, conditioning, personality, abnormal behavior, development (physical and mental), and social interaction with other people and society. The course will stress the development of a sensitivity toward an awareness of the complexity of human behavior, as well as the development of the basic vocabulary of psychology.

PSY 201 APPLIED PSYCHOLOGY

3 (3-0-0) An examination of the problems in human relationships with special attention given to the development of those human relation skills necessary for effective interactions. Topics covered include: adjustment, attitude, communication, habits, listening, frustration, motivation, and the job-finding process.

PSY 203 ADOLESCENT PSYCHOLOGY

> A course designed to present basic information about the adolescent period of human development. Physiological, developmental, and psychological characteristics are examined, with special focus on the identification and understanding of problems faced by adolescents in western culture. Prerequisite: PSY 151 or permission of instructor.

- **PSY 206** PSYCHOLOGY OF PERSONAL ADJUSTMENT I 3 (3-0-0) A survey of psychological theories of personality as they relate to dealing effectively with the adjustment demands of everyday life. Topics covered include: theories of personality and behavior, self-concept and self-esteem, stress and anxiety, constructive coping, human relationships (friends, marriage, and other intimate relationships), and human sexuality.
- **PSY 207** PSYCHOLOGY OF PERSONAL ADJUSTMENT II The study of the adjustment process, focusing on contemporary challenges individuals must face and deal with in the environment. Topics covered include problems and issues, the adjustment process, social factors influencing personal adjustment (prejudice, aggression and violence drugs) environmental factors influencing personal adjustment (population, environmental stressors, city life), and directions for healthy personality functioning.
- EDUCATIONAL PSYCHOLOGY **PSY 261** The study of the principles involved in learning and teaching. Major concepts and theories in

knowledge acquisition will be covered with emphasis on their educational application. Topics included are: age-level behavior characteristics, educational theories and their application to learning, motivation, individual differences, assessment, classroom control, and student/teacher relationships. Prerequisite: PSY 151 or permission of instructor.

3 (3-0-0)

5 (5-0-0)

3 (3-0-0)

5 (5-0-0)

PSY 262 HUMAN GROWTH AND DEVELOPMENT

An integrated study of the human life span structured to introduce basic concepts and principles of the stages of physiological and psychological development from conception to senescence. Emphasis is on personality development. Consideration is given to the common chronological processes of development and the sociological, biological, and cultural influences experienced throughout the life span. Prerequisite: PSY 151 or permission of instructor.

PSY 264 ABNORMAL PSYCHOLOGY

A course designed to introduce the learner to theories relating to abnormality. Topics covered include: definitions and history, three perspectives on abnormal behavior, psychosis, suicide and depression, criminal behavior, psychosomatic disorders, brain disorders, mental retardation, and high risk groups. Prerequisite: PSY 151.

PSY 1101 HUMAN RELATIONS

3(3-0-0)A study of the principles of psychology that will be of assistance in the understanding of interpersonal relations on the job. Motivation, feelings, and emotions are considered with particular reference to on-the-job problems. Other topics investigated are employee selection, supervision, job satisfaction, and industrial conflicts. Attention is also given to personal and group dynamics so that the student may learn to apply the principles of mental hygiene to adjustment problems as a worker and a member of the general community.

READING

- RDG 092 DEVELOPMENTAL READING I 3(1-4-0)Designed for the student who needs instruction in word recognition and/or basic comprehension skills before entering Reading 094. Instruction will be individualized. Institutional credit only. **DEVELOPMENTAL READING II** RDG 094
- 3(1-4-0)Designed for the student who needs reading instruction, this course will emphasize development of effective study skills and improvement of reading rate, comprehension, and vocabulary. Institutional credit only.
- RDG 1101 VOCATIONAL READING IMPROVEMENT 3 (3-0-0) Designed for the vocational student, this course provides an individualized framework that allows the student to concentrate on his own particular weaknesses and to progress at his own rate, Major objectives are to improve word attack skills, vocabulary, comprehension, and reading rate, through the use of multi-media materials. Required of all vocational students.

RELIGION

REL 151 INTRODUCTION TO THE OLD TESTAMENT

3(3-0-0)This course is intended to be a survey of the Old Testament touching on the principal themes such as creation, the entrance of sin into human life, and redemption. The course will also involve an historical survey relating the Biblical literature to the surrounding cultures that affected the life of Israel. The student should emerge from the course with a better understanding of the Biblical literature of the Old Testament.

REL 152 INTRODUCTION TO THE NEW TESTAMENT

3 (3-0-0) This course will be an introduction to the New Testament material through a study of the Gospels, Acts, and selected materials from the Epistles of the New Testament. It is recommended that the student should take the Old Testament introduction the first quarter in preparation for this second quarter. This is a suggestion and not a prerequisite: The student should emerge from this introduction to the New Testament with a deeper understanding of the Christian faith which is important to the understanding of our contemporary culture.

THE RELIGIONS OF MAN **REL** 153

This course surveys the religions of man, beginning with the early primitive religion of prehistoric man, and ending with contemporary developments in Eastern and Western Religion. Special emphasis is given to Hinduism, Buddhism, Zen, Taoism, Confucianism, Judaism, Christianity, and Islam. The purpose of this course is to enable the student to appreciate the faith of other men, and to become aware of major spiritual forces in the world today.

SOCIOLOGY

INTRODUCTION TO SOCIOLOGY SOC 151

5(5-0-0)This course begins with the definition and classification of things which pertain to human interaction. Definition of words and concerns with sociological concepts make it a typical introductory course. The scope of the course is wide enough so that most sociological problems are briefly mentioned.

5(5-0-0)

5 (5-0-0)

3 (3-0-0)

This course deals with the nature of self which is preparatory for a discussion of courtship. The

COURTSHIP, MARRIAGE, AND THE FAMILY

emotional and down-to-earth problems of marriage are examined in considerable detail. Such problems as marital adjustment, divorces, re-marraiges, careers and marriage, and in-laws are considered. The developing family is traced, and the necessity for maturity before marriage is considered. Prerequisite: SOC 151 or permission of the instructor.

SOC 271 SOCIAL PROBLEMS

SOC 261

3 (3-0-0) This course introduces the sociological approach to viewing social problems, and surveys possible causes and solutions to the following problem areas: physical and mental health, variations in human sexuality, chemical dependency, crime and criminals, violence, affluence and poverty, and prejudice and discrimination. Prerequisite: SOC 151 is recommended.

SOC 272 SOCIAL PROBLEMS

This course reviews the sociological approach to social problems, and surveys possible causes and solutions to problems related to the following topics: sex roles, aging, family stress, big business, employment, urban living, population growth, and the environment. Prerequisite: SOC 151 is recommended.

SPANISH

SPA 151 **ELEMENTARY SPANISH I**

A beginning course for students who have never studied Spanish. Much oral work, drill in grammatical principles, written composition, conversation, dictation, and pronunciation are stressed. SPA 151 and 152 are equivalent to two years of high school Spanish. Senior colleges which required two years of foreign langauge for admission normally accept these two courses for entrance credit or for six semester hours elective credit. Prerequisite: None. 5 (5-0-0)

- SPA 152 **ELEMENTARY SPANISH II**
- A continuation of SPA 151. Prerequsite: One year of high school Spanish or SPA 151. SPA 251
 - INTERMEDIATE SPANISH I 5 (5-0-0) A review of grammatical principles, composition, conversation, dictation, and reading. Knowledge of Spanish and Hispanic American culture is encouraged through projects and reports. Prerequisite: Two years of high school Spanish or SPA 152.
- SPA 252 **INTERMEDIATE SPANISH II** 5 (5-0-0) A continuation of SPA 251. This is a study of selective readings from short stories and poetry. A major literary paper and oral report are required. Prerequisite SPA 251. SPANISH LITERATURE I SPA 261
 - A survey of selective literature from the Middle Ages through the 18th Century with related writing assignments. Prerequisite: SPA 252.
- SPA 262 SPANISH LITERATURE II

A survey of selective literature from the 19th and 20th Centuries, with related writing assignments. Prerequisite: SPA 252.

SPEECH

SPH 251 PUBLIC SPEAKING 3 (3-0-0) A basic course in public speaking designed to give the student the poise and confidence necessary for thinking and speaking freely before an audience. Set goals in preparation and delivery of different types of speeches will be met largely by means of practice with guidance.

VOICE AND DICTION SPH 252

3 (3-0-0) Practical applications of the student's knowledge of the principles of public speaking, progressing to the more complex speaking situation. More emphasis is placed on written critiques and listening aids. Suggested for students planning to major in Education, Liberal Arts, and supporting fields. Prerequisite: SPH 251.

WELDING

WLD 1001 ARC WELDING AND OXY-ACETYLENE CUTTING

A course consisting of the operation of AC/DC transformers/rectifier welding units and a study of heats, polarities, and electrodes used in joining various metal alloys. Surface and fillet welds made in the basic welding positions will be evaluated by the instructor to determine weaknesses in the student's procedure and/or technique. This course will also introduce the student to the oxyacetylene cutting process. Studies will consist of operation principles, equipment function, set-up, and adjustment. Practices will include straight-line and contour cutting, beveling, and hole piercing. Students will operate both manual and machine cutting equipment. Safety will be stressed throughout the course. Prerequisite: None.

5 (5-0-0)

5 (5-0-0)

5 (5-0-0)

3 (3-0-0)

5 (5-0-0)

6(3-0-9)

WLD 1002 ARC WELDING AND OXY-ACETYLENE WELDING

This course involves further studies of the shielded metal arc welding process. Practices will be directed toward the student acquiring proficiency in producing quality welds; including fillet and groove welds in the basic welding positions. The course will also cover oxy-acetylene welding. Studies will include fundamentals of operation, equipment function, selection, set-up, and maintenance. Welding procedures such as surface, fillet, and groove welding will be covered; including oxy-acetylene braze welding. Safety procedures are emphasized throughout the course. Prerequisite: None.

WLD 1003 INERT GAS WELDING AND INTRODUCTION TO PIPE WELDING 6 (3-0-9) A course intended to equip the student with a sound understanding and skills in the use of the inert gas welding processes, MIG and TIG welding. Studies will involve process theory, equipment set-up, adjustment, and maintenance. Practices will include surface, groove and fillet welds in the flat, vertical, horizontal and overhead positions. Also the student will be introduced to basic pipe welding procedures. Studies will include the welding of pressure piping in the horizontal, vertical, and horizontal fixed positions using the shielded metal arc welding process. Practices will be directed toward the student gaining proficiency in producing code quality welds. Safety procedures will be stressed. Prerequisite: WLD 1002 or permission of instructor.

- WLD 1004 COMMERCIAL AND INDUSTRIAL PRACTICES 6 (3-0-9) Practice in simulated industrial processes and techniques; sketching and laying out a paper the size and shape of description; listing the procedure steps necessary to build the product; following these directions to build the product. A study of maintenance, repairing worn or broken parts by special welding applications, field welding and nondestructive tests and inspections. Prerequisite: WLD 1001, 1002 or approval of instructor.
- **BASIC WELDING (GAS)** 2(1-0-3)WLD 1101 Welding demonstrations by the instructor and practice by students in the welding shop. Safe and correct methods of assembling, adjusting, and operating the welding equipment. Practice will be given in surface welding, bronze welding, fillet welding, and flame-cutting methods applicable to mechanical repair work. Prerequisite: None.
- WLD 1102 **BASIC WELDING (ARC)** 2(1-0-3)This course consists of a study of the fundamentals of the shielded metal arc process. Topics include arc welding principles, machine set-up and adjustment, electrode selection, and process applications. Practices are directed toward the student acquiring skills in such welding techniques as running beads, fillet, and groove welds. Safety procedures in the use of equipment and tools will be stressed throughout the course. Prerequisite: None.
- MECHANICAL TESTING AND INSPECTION 2(1-0-3)WLD 1112 The standard methods for mechanical testing of welds. Introduction to the various types of tests and testing procedures. Types of tests to be covered are: bend, destructive, free-bend, guidedbend, nick-tear, notched-bend, tee-bend, nondestructive, V-notch, Charpy impact. Prerequisite: WLD 1120, 1121.
- 4 (2-0-6) WLD 1114 INERT GAS WELDING - MIG A course designed to provide the student with an understanding of the gas metal arc welding process. Topics will include principles of operation, machine set-up and adjustment, selection of consumables, and welding techniques. Practice will include seam, fillet, and groove welds in the four basic welding positions. Prerequisite: None.
- 4 (2-0-6) INERT GAS WELDING - TIG WLD 1116 A course providing the student an understanding of the gas tungsten arc welding process. Studies will include process applications, principles, variations and the selection of equipment and consumables. Practice will cover seam, fillet, and groove welds in the basic welding positions; and welds made on carbon steel, stainless steel and aluminum. Prerequisite: WLD 1120.
- **OXYACETYLENE CUTTING** 2(1-0-3)WLD 1118 This course will include a study of operation principles, component function and care, and proper set-up and adjustment of the oxyacetylene flame cutting equipment. Practices are directed toward the student acquiring skills in such procedures as straight line and shape cutting, beveling, hole piercing, and pipe cutting. Throughout the course safety will be emphasized. Prerequisite: None. 5 (2-0-9) OXYACETYLENE WELDING WLD 1120
- Introduction to the history of oxyacetylene welding; the principles of welding, nomenclature of equipment, and assembly of the unit. Welding procedures, and practice will consist of carrying a puddle; making surface, seam, groove, and fillet welds in the flat, horizontal, vertical, and overhead positions. Brazing and bronze welding are also covered. Safety is stressed throughout the course. Prerequisite: None.

6 (3-0-9)

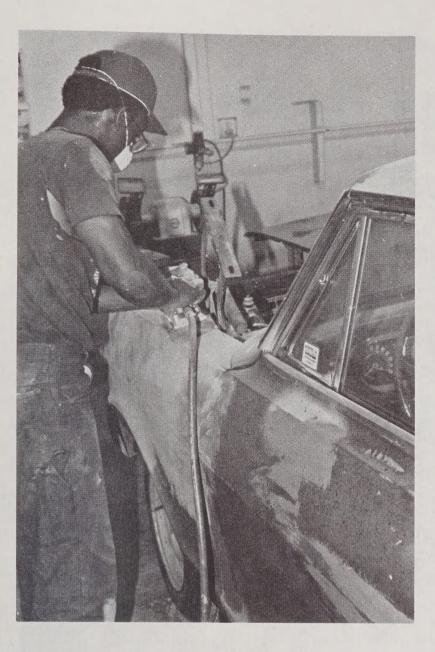

WLD 1121 ARC WELDING

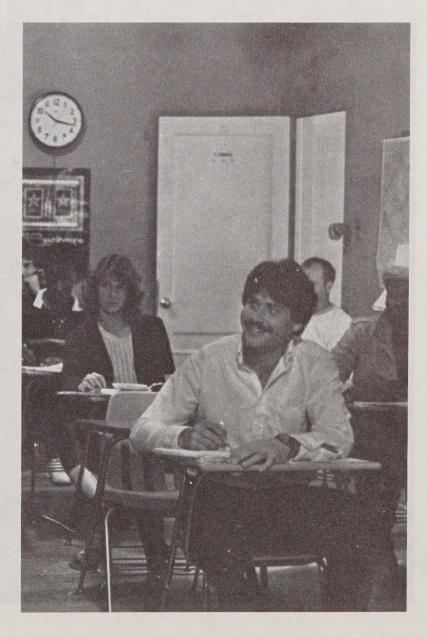

The operation of AC and AC/DC rectifier welding machines. Studies are made of welding heats, polarities, and electrodes used in joining metals by the shielded metal arc process. After the student is capable of running beads, fillet and groove welds are made in all positions and tested so the student may detect weaknesses and improve his welding technique. Safety procedures are stressed throughout the course. Prerequisite: None.

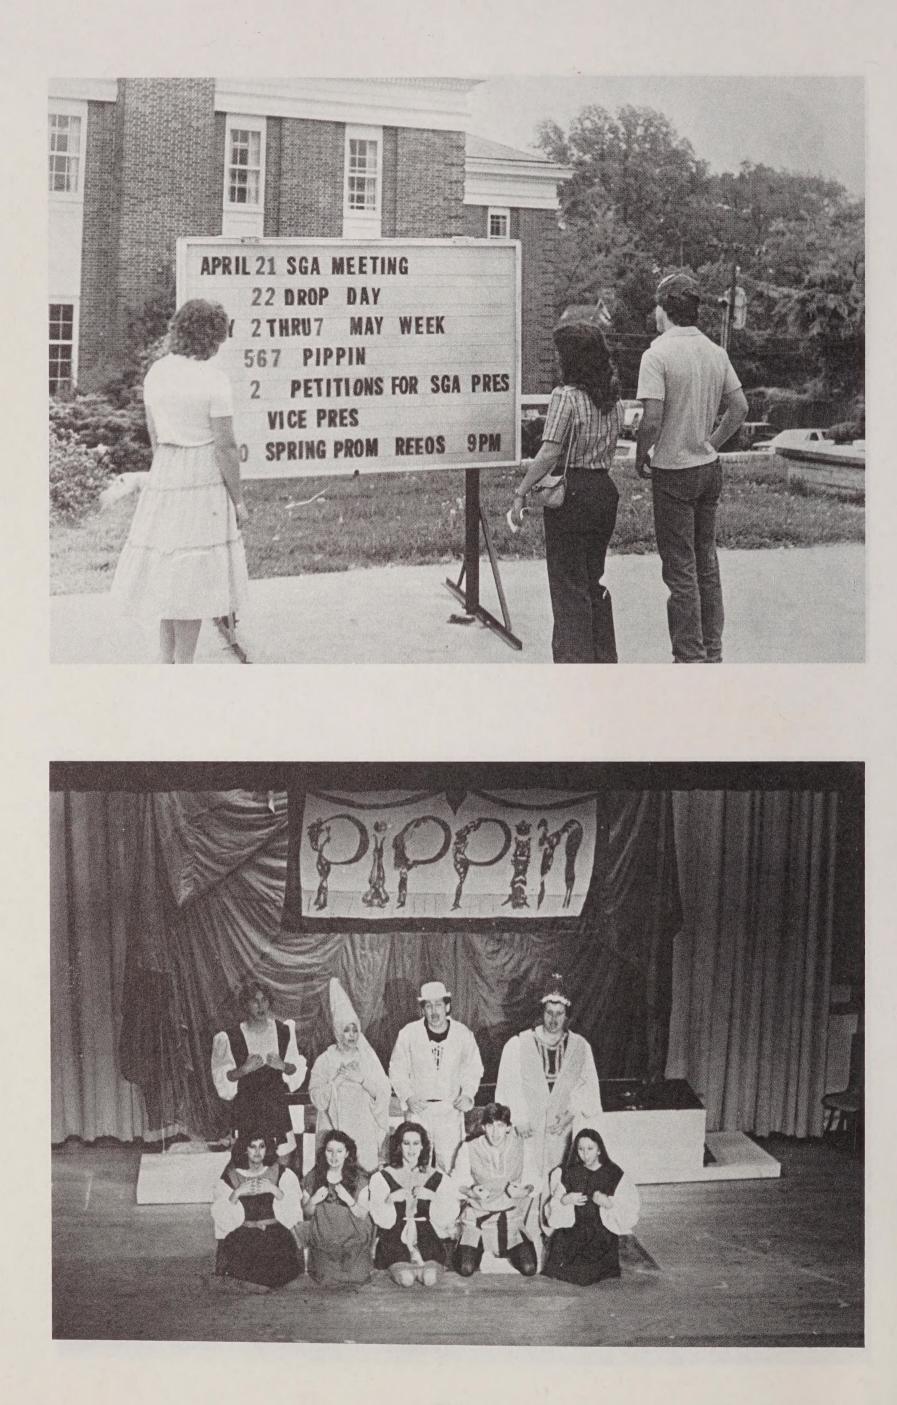

- WLD 1122 COMMERCIAL AND INDUSTRIAL PRACTICES 5 (2-0-9) Practice in simulated industrial processes and techniques; sketching and laying out a paper the size and shape of description; listing the procedure steps necessary to build the product; following these directions to build the product. A study of maintenance, repairing worn or broken parts by special welding applications, field welding and nondestructive tests and inspections. Prerequisites: WLD 1120, 1121.
- WLD 1124 INTRODUCTION TO PIPE WELDING
 - A course designed to provide practice in the welding of pressure piping in the horizontal, vertical, and horizontal fixed positions using the shielded metal arc welding process according to section IX of the ASME code. Prerequisite: WLD 1121.
- CERTIFICATION PRACTICE WLD 1125 4 (2-0-6) Practice in welding the various materials to meet certification standards. Use of various tests, including the guided bend and the tensile strength tests, to check the quality of work. Emphasis placed on attaining skill in producing quality welds. Prerequisites: WLD 1120, 1114, 1116, 1124.
